# COMMERCIAL OFFICE SOLUTIONS

## YOUR CHALLENGES

You are relied upon to ensure maximum productivity in your office environment by providing reliable network and A/V infrastructure to support more devices in more places throughout your facility or campus.

You need a solution that's designed to be better™. One that is flexible and easily scalable for the future. Easy to integrate and install efficiently and correctly the first time, so there are no delays or additional costs. A solution that is designed to exceed your expectations.

## WHO WE ARE

Legrand is a leader in network infrastructure solutions, with products designed to support your data center, building network or audio/video application. Our connectivity, physical support, cable management and cooling solutions feature notable product lines like Cablofil®, Electrorack®, On-Q®, Ortronics®, Quiktron®, RapidRun® and Wiremold®, for an integrated system that's designed to be better.

These solutions, backed by our industry leading sales, design and support teams, are the foundation for **Connected Infrastructure**, our comprehensive approach to your network. Through Connected Infrastructure, we deliver maximum performance, time saving, space optimization, superior customer experience and sustainability by design, to address your challenges, today and tomorrow.

## WE ARE A LEADER

In data center and network infrastructure solutions. ■

## OUR SOLUTIONS

### Work Spaces

**Performance with Flexibility** – Clarity® workstation connectivity provides industry leading performance in the footprints of TracJack® and Series II®.

**Clean Connections** – Surface mount boxes for both TracJack and Series II footprints provide a better way to add or extend communications and audio/visual (AV) access.

**Superior Pathways** – Legrand® 4000® Designer Series Raceway provides an aesthetically pleasing and functionally superior alternative to existing raceway profiles.

**Connecting Without Walls** – Evolution™ Series Poke-Thru Devices are excellent solutions for bringing both power and communication services to the workstation in an open space, above-grade floor environment.

### Collaborative Spaces

**Configurable Data, A/V And Power** – Vista Architectural™ columns give you the freedom to turn virtually any open space into a smart, high functioning area.

**Open Floor Designs** – OFR Series Overfloor Raceway System provides access to power, communications, and A/V connectivity options in the smallest, lowest, narrowest, ADA compliant profile.

**Advanced Enclosures** – Mighty Mo® wall-mount cabinets are designed with advanced cable management to help secure, support, and organize networking equipment.

**Secure Wireless** – Wireless Access Point (WAP) Enclosures from Legrand provide a secure, aesthetically pleasing means for integrating access points into a building's communications infrastructure.

### Presentation Spaces

**A/V For Today and Tomorrow** – RapidRun® Optical is an in-wall A/V solution able to carry multiple signals over a single cable, including VGA, Composite Video, S-Video, Component Video, HDMI or DVI.

**Ready Point-Of-Use Access** – The InteGreat™ Series offers an innovative way to better organize and provide protection for cords and cables, while offering easy access for future technology upgrades.

**Intelligent Connections** – Evolution Series A/V wall box provides power, communication and A/V services to flat screen monitors, while allowing the monitor to sit flush against the wall.

**Simple A/V That Works** – Quiktron® A/V cables and devices deliver uncompromising performance at an exceptional value.

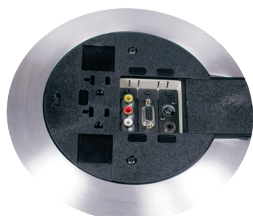

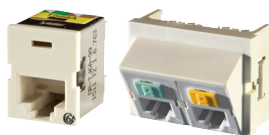

### Network Management Spaces

**High Density For Space Constraints** – High density Clarity jack and panel products combined with Infinium™ high density fiber solve density challenges without sacrificing performance.

**Adaptable Racking Systems** – Mighty Mo racking systems provide a comprehensive solution that meets the needs of networks requiring greater flexibility, optimum efficiency and superior design.

**Flexible Pathways** – Wire mesh cable trays deliver on performance, safety and economy both overhead and in-floor.

**Passive Fire and Life Safety** – FlameStopper™ fittings transition cables through firewalls and floors to ensure that the integrity of the fire rating is maintained.

## WORK

### Solutions for Work Spaces

A majority of work completed today is still performed independently, which means your offices, cubicles and other independent work spaces must facilitate maximum productivity.

## COLLABORATE

### Solutions for Collaborative Spaces

Organizations are seeing value in providing their associates open, collaborative spaces to cultivate better teamwork and innovative ideas. At the same time, today's workforce demands the ability to work productivity anywhere in your facility, at any time, and from several mobile devices at once.

## PRESENT

### Solutions for Presentation Spaces

That key client meeting is coming up and you are the one responsible for not letting technology get in the way. Today's meeting rooms and training rooms require infrastructure that is simple and efficient to use, ensuring presenters feel comfortable and confident that they can deliver.

## MANAGE

### Solutions for Network Management Spaces

Each day, you are challenged to ensure your associates are connected anytime, anywhere, and with more devices. You need to provide that flexible infrastructure to guarantee network availability while maximizing your existing space and controlling your budget.

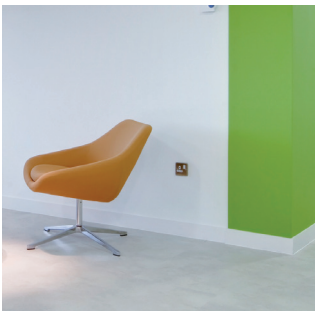

**LEGRAND OFFERS A WIDE VARIETY OF SOLUTIONS TO MAXIMIZE PRODUCTIVITY IN THE SPACES WHERE YOU WORK, COLLABORATE, PRESENT AND MANAGE.**

Our solutions simply and efficiently deliver data, audio and video to wherever they're needed, while having superior flexibility to meet the ever-changing demands of each space. ■
