

# Animals and the Environment

Here at Mobile Ed Productions, we have a commitment to presenting our content in ways that students will never forget. In *Animals and the Environment*, students will learn about the impact that humans have on animals in terms of pollution, habitat, destruction, hunting, and the pet industry.

Through an engaging presentation, your students will discover many ways humans can affect the lives of thousands of species all over the world. We discuss why dumping garbage in the ocean thousands of miles away can trigger a chain of events that may eventually impact the food we eat and the products we use. We also discuss the growing environmental threat of vanishing marine life in the Mexican seas.

The program climaxes with a chance to get up close and personal with some of the very animals being discussed. There is nothing like a personal experience to bring all that they have learned right into focus.

*Animals and the Environment* leads your students to consider positive changes as they become more aware of the inter-relationship between humans, animals, and the environment.

---

*Everyone loved the show! It was perfect - educational and intriguing.*

# ANIMALS AND THE ENVIRONMENT

## Assembly Information

---

**Age Group:** Kindergarten through 8th Grade

**Length:** Maximum of four 45-minute programs per day for one school. One or two AM or PM programs per school in a half day setting. Additional programs can be arranged at an additional fee through your program consultant.

**Size:** The area needed is limited only by the size of the facility.

**Presentation Area:** Students seated so the performer can move freely among the audience. A center aisle through the audience will allow the performer the option of moving closer to the audience during the program.

**Assistance:** Two 6'-8' banquet style tables. Custodial or adult assistance for unloading, set-up, tear-down and loading.

**Set-up/Take-down Time:** Set-up: 45 minutes. Take-down: 30 minutes. 15 minutes required between performances.

**Content:**

- Help students define endangered species, threatened species, extinction.
- Learn that extinction is a natural occurrence.
- Discuss causes of endangerment.
- Offer choices as to what can be done to help.
- Show other live animals and determine what problems could be facing these animals. Questions and answer period encouraged for students, and staff. This program is an assembly format only, for half or full day.

## Hands-on Workshop Information

---

**Workshops:** There are no separate workshops for this program.

Our curriculum based programs are designed to meet or exceed all testing and state requirements.
