

Mobile Guarding Patrol Inspections

Mobile Patrol Inspections help mitigate risk and secure property

Don't wait for something to happen; preventative patrol inspections are a proactive deterrent to theft, vandalism and other crime. Driving clearly marked Securitas vehicles, our mobile security officers patrol multiple customer sites within a limited geographic area. Mobile patrols are an effective and affordable alternative for facilities that need a physical security presence without round-the-clock payroll.

Local Securitas management will work with you on-site to develop customized inspection procedures and determine the best patrol time-frame and frequency for your property.

Mobile officers will make regular visits and can monitor hot spots, check in on employees, or adjust equipment as desired. You can be alerted of any issues in real-time via secure online reporting.

Mobile Guarding changes the way we think about security as well as its price tag, allowing clients on even the tightest budget to fully leverage Securitas USA's vast resources and industry knowledge. Mobile clients have access to the same personable and professional officers, cutting edge technology and dedicated customer service they've come to expect, while only having to pay for the services they utilize.

Advantages of Mobile Guarding Patrol Inspections:

- Flexible and cost-effective - you only pay for the services you utilize.
- Securitas Mobile Guarding provides real-time web-based reporting of our patrol inspections. Once the inspection is complete all information is accessible through a secure online portal.
- Reporting can be customized to capture any information deemed pertinent by each client.
- Multiple locations can receive synchronized service, whether separated by a couple of blocks or several states.
- Mobile officers have the support of our National Communications Center, operating 24 hours a day, 7 days a week.

A knowledge leader in security

Mobile Guarding by Securitas USA gives you comprehensive security in innovative and cost-effective packages. Cutting edge technology and software combined with specially trained Mobile officers creates real-time security that helps prevent incidents, optimizes security officers' time and reduces costs.

Securitas USA offers a broad range of services that include specialized guarding, technology solutions, remote guarding and corporate risk management; we customize offerings that are suited to the individual customer's needs. From small businesses to large corporations, our more than 85,000 employees make a difference every day.

How Mobile Guarding Patrol Inspections Work:

- Securitas USA professionals perform a detailed security analysis and work with you to create a security patrol protocol based on your specific needs.
- Uniformed Mobile officers driving marked patrol vehicles make routine visits to inspect your premises.
- Typical duties performed include:
 - Exterior inspections
 - Interior inspections
 - Locking/unlocking of premises
 - Lone worker checks
- Specialty duties performed include:
 - ATM anti-skimming inspections
 - Temperature checks
 - Lighting inspections
 - Equipment adjustments
- Should there be a security breach or threat, the officer can summon local law enforcement or emergency personnel.
- Real-time computerized reporting instantly alerts you to any security issue.
