

Océ | TDS₃₂₀

System Information

Effortless workflow, true reliability

Wide format copy, print and scan system

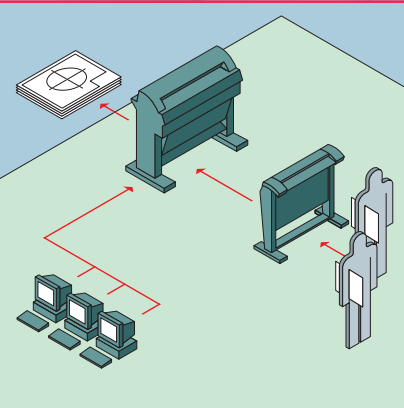

Whether you work for a small technical company or in a workgroup in a larger organization, the requirement is simple: generate the output you need, when and how you want it, with the least effort possible.

This requires a dependable multifunctional system that provides an effortless workflow.

The Océ TDS320 is that system. This affordable wide format solution supports your workflow and offers the true reliability you need.

Flexible configurations fit into your environment

Available in versatile, upgradeable configurations—1 or 2 roll printer, copier, or multifunction system with scanning capability—the Océ TDS320 complements any work environment. The Océ TDS320 is fully integrated with your most commonly used applications and offers high-performance drivers for AutoCAD, Windows and Macintosh. With today's lowest noise, heat and ozone emissions, employees will hardly notice the system, even when it is placed in a departmental setting close to user workgroups.

Productive system for an effortless workflow

The Océ TDS320 is simply designed to ensure that employees spend less time printing and copying drawings and more time on their core responsibilities. With automatic set collation and orderly output stacking, employees get the documents they require without the need for manual sorting. Drawings are scanned to TIF, PDF, or CALS and placed directly on the network, FTP or controller, thus distributing scanned images, where required, in one step. To further streamline employee workflow, the scanner is separate from the printer allowing multiple users to access and use the system at the same time.

Effortless workflow, true reliability

Ready and available when you need it

Unlike most inkjet systems, the Océ TDS320 has the Océ Power Logic® controller managing all system activities. This ensures rapid processing of large files and concurrent scanning, copying and printing, thus minimizing employee downtime. Warm-up time is eliminated with the Océ Radiant Fusing print technology, meaning employees get their output when they want it without delays.

High quality for optimal presentation

The Océ TDS320 provides output with fine details, sharp lines, smooth curves and high-level gray scale through the 600 dpi printer. With the industry leading Océ Image Logic® technology, scanned images are automatically enhanced at the touch of a green button, delivering copies and scans right the first time. No costly trial and error ensures an effortless workflow.

True reliability is key

Reliability and flexibility are key trademarks of Océ systems. With the Océ TDS320 you can be assured of a system that will have continuous, trouble-free performance and be available when you need it. You can rely on Océ for service and support, protecting your investment and giving you peace of mind for years to come.

**Printing for
Professionals**

Océ is a leading supplier of digital document management and delivery technology. The company's solutions are based on Océ's advanced software applications that deliver documents and data over internal networks and the Internet to printing devices and archives—locally and around the world. Supporting the workflow solutions are Océ digital printers and scanners, considered the most reliable and productive in the world. Océ also offers a wide range of consulting and outsourcing solutions.
