

CARPET SPOTTER-GREEN

Contains outstanding anti-resoiling technology which is critical with spotting because in most cases, chemical residue is not removed after application.

The problem with other carpet cleaning solutions is they leave a sticky residue and cause rapid resoiling. We have eliminated that problem with our **e-clean Carpet Spotter**. Third generation dehydration technology without acrylics.

How to use:

Vacuum thoroughly. e-clean Carpet Spotter is safe to use on any modern carpet fiber, but it's best to test carpet in an out of sight spot and allow to dry to be sure carpet colors are fast.

REMOVING SPOTS: Set sprayer* to deliver a coarse stream and direct to hit spot. Many spots just disappear. If it needs rubbing, use a soft white cloth and work from outer edge toward center or use the handy JetBrush to agitate the e-clean Carpet Spotter into the carpet.

CLEANING ENTIRE CARPET: Requires no mixing. 1. Apply with sprayer* set about half way between mist and coarse stream...2. Spray area about 4' wide by 2' deep so you need not walk in it while wet...3. Allow 2 or 3 minutes to penetrate...4. With clean Jetbrush agitate sprayed area*...5. Allow carpet to dry before opening to traffic.

Packaged in 12/1 Quarts
