

PROFESSIONAL GRADE
ODOR CONTROL

**BETTER CLEANING
FASTER DRYING**

**NO STICKY
RESIDUE**

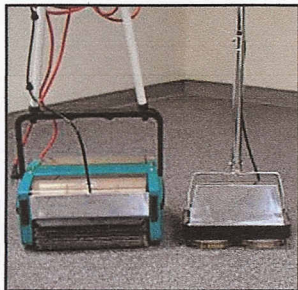

**RESISTS
SOILING**

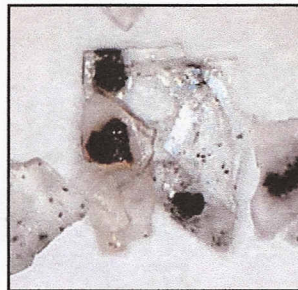

**RX 82 SOIL RESISTANT
QUICK DRY CARPET CLEANER**

RX 82 brings completely new technology to carpet care and allows you faster, easier methods of cleaning. It has a completely neutral pH yet cleans better than other carpet solutions, and it dries faster and contains *AIRICIDE® Odor Counteractant*, but its most important benefit is that it leaves no sticky residue to cause resoiling.

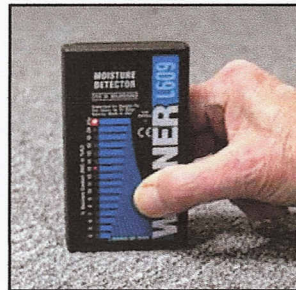

RX 82 is highly concentrated and economical to use, but its biggest saving is by not resoiling. It postpones or eliminates the cost of future cleanings. Use on carpets of all kinds and used with any method (as a prespray, spotting, extraction, self-contained and truck mount) bonnet cleaning, rotary shampooing, low moisture spray & brush and spot cleaning).

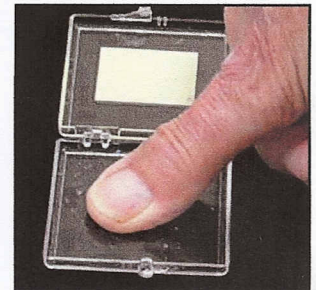

Great cleaning of any carpet with any equipment.

Dries to non-stick crystals with soil captured inside.

Fast drying allows quick opening of cleaned area.

No sticky residue to cause resoiling. Carpet stays clean.

RX 82 SOIL RESISTANT CARPET CLEANER

DESCRIPTION

RX 82 is a blend of the most modern surfactants, has a neutral pH with superior cleaning ability, but is most unusual in the way it captures soil and dries. Unlike typical carpet cleaners it leaves no sticky residue to promote resoiling. It dries to miniature crystals with the soil encapsulated inside. The crystals themselves will not stick to the carpet pile and lie loosely in the carpet pile for easy removal at the next routine vacuuming.

USES

May be used on any carpet or rug not harmed by soap and water (though RX 82 is not soap). It may be used with any method and equipment - extraction, pre-spraying, bonnet cleaning, cylindrical brush, even rotary and foamer machines and for spot cleaning. Its encapsulation of soil into crystals, its quick drying and resistance to soiling make possible the new spray & brush, low moisture system described to the right.

BENEFITS

SAFE ON ALL FIBERS - Neutral pH. Recommended for wool and all synthetics.

SUPERIOR CLEANING - Quickly penetrates, emulsifies, loosens and suspends tenacious soil for complete removal.

SOIL RESISTANCE - Unlike typical cleaners that dry to a gummy, sticky residue, RX 82 dries flaky, non-absorbent and soil resistant.

FASTER DRYING - Some cleaners leave a hygroscopic residue that attracts moisture from the air and seem never to dry.

MORE EFFICIENT VACUUMING - More dirt can be removed by easier, less time consuming work.

NEW-LOW MOISTURE CLEANING - Cleans better than powders. Soil remains on surface. No need to wet carpet to backing.

ONE PRODUCT DOES ALL - May be used with just about every type of carpet cleaning equipment and with every mechanical or manual method of cleaning and spotting.

SAVES TIME & LABOR - Its soil resistance eliminates or greatly postpones the need for many future cleanings.

MEETS "GREEN" REQUIREMENTS - Meets California's strict VOC requirements and new OTC guidelines. Accredited for use on new stain resistant nylon.

HOW TO USE

NOTE: Before using, test carpet in an out of way spot for colorfastness. Avoid overwetting.

SPOT CLEANING: Dilute 1 part RX 82 with 4 parts water. Apply with clean cloth or sprayer. When rubbing, work from outer edge toward center of spot.

AS A PRE-SPRAY: Dilute approx. 4 oz. RX 82 per gal. of water. Spray heavily soiled areas of carpet. Allow carpet to stay damp about 5 minutes. Then proceed as below.

LOW MOISTURE BRUSH IN: Dilute 1 part RX 82 with 6 parts water. Spray manageable area of carpet. Allow to stand a few minutes and brush in with a light machine or hand brush.

EXTRACTION: Dilute 2 to 3 oz. per gal. water and use according to machine directions.

BONNET CLEANING: Dilute approx. 4 oz. per gal. of water. Spray solution over the bonnet and over a manageable area of the carpet. With bonnet under the machine, scrub sprayed carpet. Change or rinse bonnet frequently as it becomes dirty.

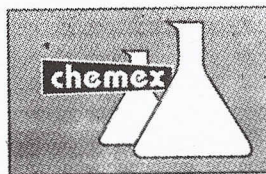

ROTARY SHAMPOOING: Dilute approx. 2 oz. per gal. water. Release solution sparingly from machine tank.

AS A RINSE AID: Sticky residue from previously used cleaners can be removed with solution of 2 oz. per gal. water used with extraction machine.

SPECIFICATIONS

APPEARANCE OF LIQUID	Clear, colorless
pH	7.0 ± 0.5
BIODEGRADABILITY	Complete
REFRACTIVE INDEX	1.3520 ± 20
ODOR COUNTERACTANT	AIRICIDE®
RESIDUAL.....	Clear, transparent, non-sticky, friable
NON-AQUEOUS CONTENT	33.9%
SHELF LIFE	Min. 2 yrs. at room temperature
FLAMMABILITY.....	None
