

FLOATING LIFT STATION DEGREASER

Strips away grease with the power of d'Limonene

This is our most popular, all-natural solution, for keeping lift station surfaces free of grease accumulations. Made with 100% d'Limonene, this product uses a non-emulsifying formula, so it floats on the surface of the water. As waste water levels rise and fall, it coats all lift stations surfaces and removes heavy grease deposits from lift station walls. It also leaves behind the fresh scent of oranges, as it cleans.

Biodegradable, so it will not interfere with the biological digestion of existing bacteria.

FEATURES & BENEFITS:

- *Contains 100% natural d'Limonene to dissolve grease and fats*
- *Controls odors in Lift Stations*
- *Floating formulations acts as an "odor barrier" to lift stations*
- *Will not harm bacterial action in sewage treatment plants*
- *Contains no petroleum solvents*
- *No alkalinity or dangerous acids*

DIRECTIONS:

Use approximately 1/2 gallon for each square foot of water surface. The special floating formula washes down the sides of the lift station, as the water level rises and falls.

For circular lift stations, calculate the square feet of water surface using this formula: $3.145 \times r^2 = \text{surface area}$ (r = the radius in feet)
