

Thermostats

COOLIT & PortaPac Series

Three thermostat options give you cool control!

You now have more control over your controls! The COOLIT and PortaPac models come standard with a manual OFF—COOL — FAN switch and a built in interface that allows you to install the thermostat of your choice. All thermostats can be unit or wall mounted and come with 6' of cable. Just connect the thermostat into the jack to override the standard controls. AirPac offers three thermostat options.
