Cold weather can add a chill to your bottom line. Don't let heater-related emergencies or construction delays interfere with your project schedule or business profitability.

Heater Benefits - HEATIT™ Series

- HEATIT1.5 Small-size, rugged construction one-room heater. Plugs into 120 volt/15 Amp outlet.
- HEATIT3 Medium size, rugged construction heater. Plugs into 240 volt/15 Amp outlet.
- HEATIT9 High-power construction heater for large spaces. Plugs into 240 volt/40 Amp outlet.

Heater Benefits - HEATPAC™ Series

- Overheat protection to ensure safe and effective use
- Stainless jacketed heating coils provide even, reliable heat
- Room thermostat from 32° F to 212° F allows you to control the environment
- Integrated ambient thermostat
- High temperature rise with uni-directional fan function
- User friendly and proven reliability

Distribution Options - HEATPAC™ Series

With our distribution panels, heaters can be placed inside your space to maximize the use of heat and minimize the amount of power cable.

- Four 40 KW heaters with one distribution panel
 - Individual circuit breakers for each heater
 - Easy CAM lock connections for power
 - Extension cords from panel to heater

Heat up your bottom line! Contact AirPac today to rent portable electric heaters. We'll work hard to earn your business.
