

Cable Series lift

Cable Lift FEATURES

1. 16/1 ratio Chain Brake Winch. Smooth, safe and reliable, with automatic braking disk to ensure a positive lock. Most important part of 3 components that lifts your boat.
2. Large 42" wheel – lifts heavy boats with ease. Weather resistant knob helps turn wheel at blazing speeds. Powder coat finish looks great for many, many years.
3. Channeled upright posts – stronger than competitors, makes assembly a breeze.
4. Oversized 2.5" tube and cable washer plates – strong and easy to adjust. Non-handed tube means you can't assemble incorrectly. Flip it over and turn it 180° – still works...
5. Custom caps finish off your lift for a professional look.
6. 4' adjustable leg. Longer legs available.
7. Large, strong 8" x 16" Foot Pad – standard. Larger sizes for muddy conditions available also.
8. Large, 2" x 6" Beam Tube – stronger than competitors.

9. Carpeted cedar boards. Thick rubber back carpeting and weather resistant cedar boards protect your hull for many years.
10. Large 5.5" Nylatron GSM Pulley – largest in the industry. Pulleys are the third of 3 most important components to lift your boat. Larger pulleys mean longer life cables, period. Nylatron composite means no corrosion to transfer to cables. Nylatron composite means no metal to metal contact with cables, longer life is guaranteed. Our pulleys operate smoothly from the first year to the 20th. Nylatron composite is so strong, that it is used to make transmission gears.
11. Large Stainless Steel Bolts fasten the bed beams together and gives you a large surface area for the Nylatron Pulleys to rotate on.
12. Strong Stainless Steel 5/16" Cables. No cheap, skinny, galvanized cables on this lift. Cables are the second most important part of a quality lift.
13. Walk through bracing, more expensive to build, easier to board your boat.
14. Easy to follow labels – makes assembly simple and easy to follow.
15. UHMW Bed Guides – the most durable, slipperiest, plastic available. Won't foul like roller guides.
16. Our CNC equipment machines accurate, well fitting parts that perform well and last longer.
