Duct Heater Flange Mount

Work Order #

BTU Plenum Heaters are UL/**A.R.L. Listed**, suitable for Zero Clearance Installations to 100 KW in horizontal duct systems and may be used with Heat Pumps, Cooling Units or any Forced Air System.

Contactors and protective devices are included. Automatic reset thermal limit switches are used as primary protective devices. Manually resettable devices are in the power circuits as back-up protection. 24 V standard control circuits and stainless steel hardware.

Control panels and shrouds are of heavy galvanized steel. Open wound helically coiled nickel/chrome alloy elements are set in frames of sturdy galvanized steel with rugged steatite insulators and stainless steel terminations. Hinges and automatic latches are on all control box covers.

MOUNTED UL/ARL LISTED OPTIONS AVAILABLE WITH BTU DUCT HEATERS												
1.	Air Pressure Switch Positive Pressure (Standard)	11. Control Voltages - 120V to 277 V										
1A.	Fan Interlock relay (w/Air Switch)	12. PE (Pneumatic Electric) Switches Per Stage										
2.	Circuit Fusing - 48 Amps or less	13. Mercury Contactors (silent)										
3.	Control Panel Insulation	14. Low Watt Density Elements										
4.	Upflow Vertical	15. Low Profile Model										
5.	DownFlow	16. Pilot Relays										
6.	Special Dimensions	17. Disconnect Switches										
7.	Transformers - step down to 24 V Class 2	18. SCR Control 100%, Input Signal 0-10 VDC or 4 - 20 MA										
7A.	Transformer - step down to 120 V w/Fuse (Standard)	19. Step Controller, Number of Stages										
8.	Pilot Light	20. Thermostat, Model Number										
9.	Reverse Air Flow	21. Flanged Mounted Plenum (Standard)										
10.	Delay Relay between Stages 24 V only.	22. Single Point Line Connection										
		Notes										
		ΙωΙ
