FEATURE	SPECIFICATION
Height	10 in. (25cm)
Width	6 in. (15cm)
Depth	2 in. (5cm)
Timer Length	1 – 50 minutes

Application:

The Timer Panel is used to remotely turn ON/OFF the RF at the transmitter for a selected length of time. It consists of an ON/OFF switch, TIMER and Status Indicator. The timer can be set from 1 – 50 minutes. The transmitter can operate continuously if the timer is turned counter-clock wise to the HOLD position. The blinking of the Status LED indicates the presence of modulation.
