Awning Fabric

## Frequently Asked Questions

### ***Is Coastline Plus awning fabric waterproof?***

**Yes.** Coastline Plus® awning fabric is vinyl completely waterproof. The fabric can be dielectrically, hot air, or wedge welded to ensure that seams are 100% waterproof as well.

### ***Will Coastline Plus® awning fabrics develop mildew?***

**No.** The Coastline Plus® formulation contains mildew inhibitors that will not support mildew growth.

### ***How do I clean Coastline Plus® awning fabric and how often?***

Occasional hosing with clear water will prevent dirt accumulation. Most dirt accumulation can be removed by mild soap, water and a soft brush. Rinse thoroughly. In extreme cases, most dirt can be removed by applying half strength bleach and brushing softly to cover thoroughly the necessary area. Allow solution to remain for two or three minutes, then thoroughly rinse with clear water, protecting surrounding materials or plant growth that might be damaged by the bleach.

### ***Will Coastline Plus® awning fabrics accept Pressure Sensitive Vinyl Graphics?***

**Yes.** Coastline Plus® is Top Coated with a specially formulated and proprietary acrylic lacquer treatment called Rain Kleen® that acts as a barrier between the fabric and the vinyl graphic. This prevents plasticizer migration which is the leading cause of Pressure Sensitive Graphic failure. Other decoration methods include: solvent based digital printing, heat transfer films, heat sealed and inset vinyls, applique, silk screening and hand painting.

### ***Will Coastline Plus® awning fabrics provide UV protection?***

**Yes.** Coastline Plus® awning fabrics have been tested and proved to provide 99.9% UV protection from the sun's harmful rays in most colors. The fabric offers a SPF rating of 50+.

### ***Is the Coastline Plus® 5-year warranty pro-rated?***

**No.** Unlike most competitive awning fabrics, the manufacturer's warranty is "full" replacement during the entire five (5) year warranty period.

### ***How many colors and patterns does Coastline Plus® awning fabrics offer?***

Coastline Plus® awning fabrics are available in **102** patterns (**67** solids – **35** stripes). This is the largest color selection of vinyl awning fabrics in the industry!

### ***How long will a Coastline Plus® awning cover last in sunny, high humidity areas?***

Our awning customers in Florida tell us that Coastline Plus® awnings can potentially last years past the 5 year expected life if the fabric is properly cleaned and maintained.

### ***What is Rain Kleen® Top Surface Treatment?***

Rain Kleen® is a proprietary formulation of clear acrylic lacquer that is applied to the top surface of many of Herculite's awning and marine fabric brands. The Rain Kleen® surface treatment helps prolong fabric life and preserve color intensity. The surface treatment supports pressure sensitive graphic applications and, as the name implies, enables natural rainfall to help keep the fabric looking clean.

### ***Is Coastline Plus® Fire Resistant?***

**Yes.** Coastline Plus is inherently flame resistant, does not require retreatment and is ideal for commercial awning applications. CSFM Reg. Title 19, NFPA-701, ASTM E84-81A, Flame Spread Rating Class A (15).
