

Lean Power

Energy Efficiency as a Waste Reduction Strategy

Reduce energy costs and increase the bottom line

Lean practices are not limited to internal processes but to the essence of how a business approaches every aspect of their operations. Come and learn how to apply Lean principles to your energy consumption patterns and lower your energy costs in a holistic and substantive way. College of the Canyons (COC) is convening business people from the Northern Los Angeles County and Ventura County on Friday August 28th to hear presentations on the theme of energy efficiency as a waste reduction strategy. We will discuss emerging technologies, methods, and available incentives for reducing energy consumption, and make the logical tie-in to Lean process management.

Seminar Speakers Include:

--**A. Kris Widdison, BS, MS, LSSBB**, *Sr. Consultant with California Manufacturing Technology Consulting*. Mr. Widdison's professional experience covers more than 40 years of hands-on experience with business improvement initiatives in the private sector including Lean manufacturing and energy/environmental management practices.

--**Dave Intner** *Licensed Architect, LEED AP, and Certified Energy Manager (CEM) with Southern California Edison (SCE)*. A graduate of Cal Poly, San Luis Obispo, Dave works closely with the architectural and engineering community to help SCE's customers design and construct energy efficient and sustainable buildings through the Savings by Design program.

--**Rowena Striff** *Sr. Facilities Engineer with Lockheed Martin Co.* Ms. Striff is the Energy Manager for Lockheed Martin's Aeronautics Co., and spearheads energy related initiatives that have resulted in substantial savings and growth opportunities for the company.

**FREE
EVENT!**
