

Let's get started...

Thank you for choosing JAR Systems as your cart provider and congratulations on a smart purchase. This high capacity cart combines easy maneuverability with best in class charging and is great for small and large class sizes alike.

To Begin Charging:

- Connect to Power
- Select Charging Mode...

OR

Best used if all devices are powered off and returned to the cart at the same time.

Best used if all or some devices are left on or are returned at different times.

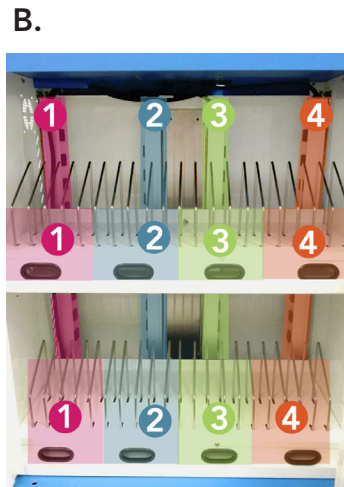

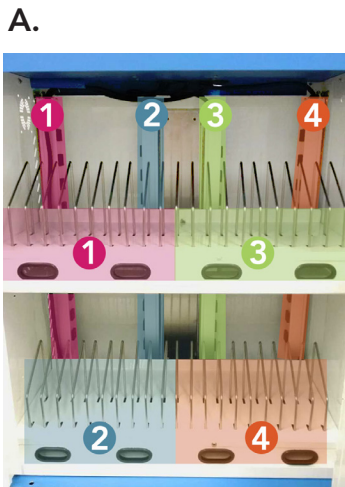

Wiring Tips

Each of the four power strips in the cart corresponds to an LED number on the Intelligent Charging System (C).

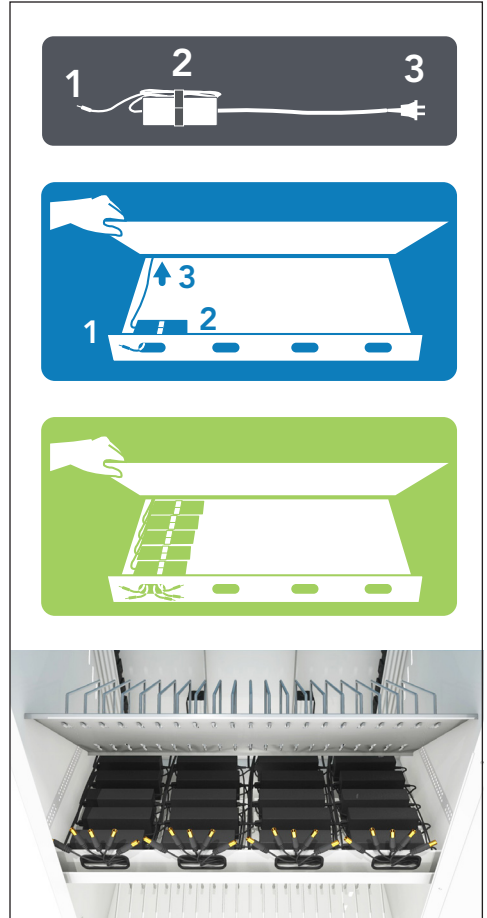

Wiring sections of the cart to one power strip will allow the user to view the charging status of each section on the charging system. See section examples (A & B).

Lift the shelf to reveal the AC adapter storage tray. Secure excess cable length to the AC adapter and place the first adapter against the front of the tray. Place the second adapter behind the first, and so on (D). Cables should be installed in order for best results. Questions? Call (866) 393 4202.
