Position Title: Senior Healthcare Data Analyst
Status: Full-Time
FLSA: Exempt
Reports To: Chief Product Officer
Location: Burbank, CA, United States

COMPANY OVERVIEW: Health Data Vision, Inc. (HDVI) is a rapidly growing California based healthcare technology company providing a state of the art medical record retrieval SaaS platform and services to support health plan risk adjustment and HEDIS compliance initiatives. HDVI is backed by Redhills Ventures, LLC and Upfront Ventures, a leading SoCal VC firm.

We seek a Senior Healthcare Data Analyst responsible for the definition of requirements, testing and rollout of all data-flow related features of the MRCS workflow platform.

Responsibilities include:
- Define, evolve and drive automation of all data flows (into, out of and within) HDVI's SaaS platform to achieve industry-leading, speed, accuracy and scale
- Interpret government regulations and data formats, inform the product roadmap and drive product to meet compliance and superior time-to-market advantage
- Participate in user stories, sprint estimates and other aspects of Agile development
- Assist in the development and documentation of Test Plans
- Perform data testing and work with the QA automation team
- Submit, track and monitor bug resolution and enhancement requests
- Rapidly prototype dashboards and data visualizations
- Support customer-facing teams with issue resolution, education and special projects

Qualifications:

Desirable candidates will have the following qualifications:
- Education: BS/MS in Computer Science or a healthcare-related field preferred
- Experience: 5+ years of healthcare data management and analytics experience in a provider-related organization
- Subject matter expertise with HEDIS/HEDIS Hybrid, MA Risk Adjustment, RADV, & Commercial Risk Adjustment
- Excellent verbal and written communication skills
- Goal-oriented driven individual who can work independently and contribute in a fast-paced team environment
- Problem solver with a constant focus on shifting priorities and business/customer needs
- Strong knowledge of data extracts and/or ETL processes, data integrity and validation
- Proven ability to use and manage large datasets to perform analysis and report metrics

- Specific technical skills as following:
  - Microsoft SQL Server
  - SQL Management Studio
- Proficient with Microsoft Office suite
- Tableau Desktop (or similar data analytics/visualization tools set), specifically dashboard and visualization – rapid prototyping and ad-hoc analysis

All qualified applicants will receive consideration for employment without regard to race, color, religion, age, sex, national origin, disability or protected veteran status, other protected status, or any other characteristic protected by local, state or federal laws, rules or regulations.
