

Specialty Technical Publishers (STP) and Specialty Technical Consultants(STC) Publish Environmental, Health & Safety (EHS) Audit Protocol for Australia, National

Latest EHS Regulations Updates Assist Companies to Achieve EHS Compliance

([PRWEB](#)) August 13, 2015 -- Specialty Technical Publishers (STP) and Specialty Technical Consultants (STC) announce the availability of the newly updated International Audit Protocol Consortium (IAPC) EHS audit protocol for Australia, National. Leading companies around the world use IAPC EHS audit protocols to understand the scope of their EHS regulatory obligations and rapidly collect, share, archive, and export audit findings in a cost-effective manner.

IAPC EHS Audit Protocols are now prepared by STC in partnership with STP and continue to focus on those national (plus, in some cases, regional or provincial) EHS requirements that have site-specific application for manufacturing operations. As a leading EHS management consulting firm with a global network of experienced EHS teaming partners, STC has in-depth knowledge and technical expertise of local/regional EHS requirements.

STP and STC maintain leading-edge EHS audit protocols for more than 30 jurisdictions. The protocol documents are written in English and are available on CD-ROM in MS Word, Adobe Acrobat and Excel formats, as well as through STP's web-based portal or can be integrated into an existing company platform. Using the protocols' custom templates and advanced functionality features, auditors can easily track audit findings and manage data over time to improve compliance, risk management and safety performance. In addition, STP's formatting is compatible with leading risk management and sustainability platform providers.

Highlights of selected legislation covered in the newly updated protocol include:

- The "Ozone Protection and Synthetic Greenhouse Gas Management Act 1989" and the "Ozone Protection and Synthetic Greenhouse Gas Management Regulations 1995" have been amended with updates to requirements for manufacturing and importing ozone depleting substances and for refrigerants, extinguishing agents and discharge of scheduled substances. Exemptions for certain types of equipment have been expanded and requirements of license holders and for recordkeeping have been revised.
- The "National Greenhouse and Energy Reporting Act 2007" and "National Greenhouse and Energy Reporting Regulations 2008" have been amended with changes to the greenhouse gas registration and reporting requirements. In addition, the "Clean Energy Act 2011", which established a carbon pricing mechanism and trading scheme, was repealed effective 1 July 2014. The "Clean Energy Act 2011" had required liable entities to register and report annually on their emissions or potential emissions in relation to the 2012-13 and 2013-14 financial years under the "National Greenhouse and Energy Reporting Act 2007" related STP publications.
