We Finish

Professional results, start to finish.

Since our founding in 1973, Can-Am Tool continues to provide innovative, top quality, and high performance tools to drywall finishers worldwide.

As a pioneering company for the industry, our continued commitment to quality means that our tools are designed for ease of use, provide exceptional value, and work effectively in any finishing environment.

Can-Am Tools are built to finish your toughest jobs. We strive to provide you our finest tools at the highest value giving you consistent, professional results time after time.

Applicator Tubes

Essential for a great drywall finish.

The Applicator Tube, a Can-Am original, supplies joint compound to virtually any Applicator Head and Corner Finisher.

Lightweight aluminum construction gives it durability, and replacement parts add lifespan to the tool.

		Length
	A100 Compact delivery in confined spaces.	24"
	A200 Good for when access is limited.	32"
	A300 Perfect for almost every corner.	42"
	A400 Reach higher with this extended Tube.	60"

A133
Applicator Ball

Corner Flushers

A reliable, easy to use finisher.

Finish quick and easy with Can-Am's original Flusher; smoothly wiping and feathering joint compound to finish both sides of the corner at the same time.

With top quality, flexible stainless steel blade construction, get great results every time.

Standard Flushers

This classic design is the simplest to use, flushing both sides in a single pass.

		Flush Width	Track Width	Angle
	B100	2½"	1½"	90°
	B200	3"	2"	90°
	B300 Wide Track	3"	2¼"	90°
	B400	3½"	2"	90°
	B500	4"	2"	90°
	B600 Offset	3½"	2"	135°

Direct Flushers

Save time, applying joint compound and flushing with the same tool.

		Flush Width	Track Width	Angle
	C100	2½"	1½"	90°
	C200	3"	2"	90°
	C300 Wide Track	3"	2¼"	90°
	C400	3½"	2"	90°
	C500	4"	2"	90°
	C600 Offset	3½"	2"	135°

Roller Flushers

Embed your tape as you flush for fast results.

		Flush Width	Track Width	Type	Angle
	B700	2½"	1½"	Standard	90°
	B800	3"	2"	Standard	90°
	C700	2½"	1½"	Direct	90°
	C800	3"	2"	Direct	90°

Accu-Just Flushers

Smooth results for varying angles.

Unlike traditional flushers, the Accu-Just varies to any angle between 72° and 135° with a simple push. This allows you the freedom to flush most any angle you encounter, saving you time and money.

NEW!

		Flush Width	Track Width	Angle

Basic Operation

Like almost all drywall tools, our tools work best when free of dried compound. Regular cleaning will prevent most performance problems, and prolong tool life.

Petroleum products should never be used to lubricate rubber parts, as it will cause them to swell or crack.

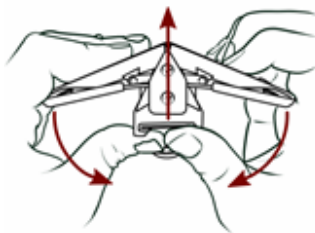

Parts such as plastic and rubber components may be replaced to extend the life of the tool. Contact your local Can-Am Tool dealer for replacement parts.

Accu-Just Flusher Adjustment

Simply pressing a completely relaxed Accu-Just into any angle in its range will compress the tool to automatically match the corner exactly. However, we suggest compressing the tool to an angle a few degrees larger than the corner you are flushing before applying pressure to the Flusher.

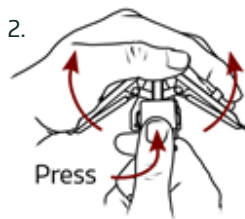

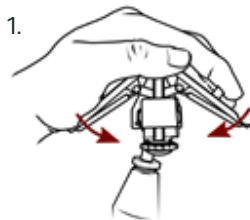

Compress

1. Hold the Flusher with your fingers on the front face, and your thumbs against the body.
2. Pull back with your fingers, and press forward with your thumbs.
3. Fine tune the angle with the thumbscrew if desired.

Relax

1. Gently squeeze the sides together to relieve pressure.
Note: This is easiest when the Flusher is attached to a Handle.
2. Press the quick release, then slowly relax your grip on the sides.

You can call our customer support line weekdays from 8am and 4pm MST. We are here to answer any technical questions about our products, and assist with inquiries relating to warranty, and sales. Reach us at 1.866.605.0258, or by email at info@canamtool.com.

Troubleshooting Common Applicator Tube Issues

Mud is leaking past the piston.

1. Clean the Tube by removing the rod assembly, then rinsing the rod, piston, and the inside of the Tube with water.
2. Ensure the piston is undamaged, and firmly attached to the rod.

The handle is hard to pull/push.

1. Clean the Tube by removing the rod assembly, then rinsing the rod, piston, and the inside of the Tube with water.
2. On the piston, there is a label indicating the location of an, "Air Vent". If the vent hole is obstructed, use a pin or paper clip to gently clear it (do not enlarge the hole).
3. Check the straightness of the rod; a bent or damaged rod will often move smoothly in one part of the Tube, but not others.
4. Ensure nothing is causing friction where the rod passes through the plastic end cap. If needed, the rod can be removed from the end cap by removing the screw on the rubber grip.
5. Contact your nearest Can-Am Tool dealer to arrange a replacement, or repair.

Full Lifetime Performance Policy

Can-Am tools are promised to be free of defects in material and workmanship for the lifetime of your Can-Am Tool. All you have to do is take your tool to any authorized Can-Am Tool dealer with a copy of the purchase receipt. **Can-Am will repair or replace, at our option,** any defective product.

This Performance Policy ends when the product becomes unusable for reasons other than defects in materials or workmanship. Failures due to misuse, abuse, or normal wear are not covered. Rubber seals and other "wear" parts are not covered.

This policy gives you specific rights, and you may have other rights, which vary by province, state or country. Can-Am will abide by the laws of the jurisdiction in which the product was sold. Can-Am is not responsible for any incidental or consequential damages.

THIS FULL LIFETIME PERFORMANCE POLICY IS THE SOLE PERFORMANCE POLICY. NO AGENT, DEALER OR OTHER PERSON IS AUTHORIZED TO ALTER THIS POLICY OR MAKE ANY OTHER PERFORMANCE POLICY ON BEHALF OF CAN-AM TOOL CORP.
