

# Payment solutions for retail platform **Magento**

By combining Magento and Ingenico ePayments you create a global e-commerce enterprise solution which is scalable, tried and tested by some of the largest retailers in the world.

## **Continuous innovation**

Seamless upgrades delivers continuous innovation without disrupting your business, ensuring that platform functionality is always current. Pre-built integrations to third-party technologies allow you to deploy complementary technologies quickly and cost-effectively. Create tailored and relevant digital shopping experiences that differentiate you from the competition and grow market share.

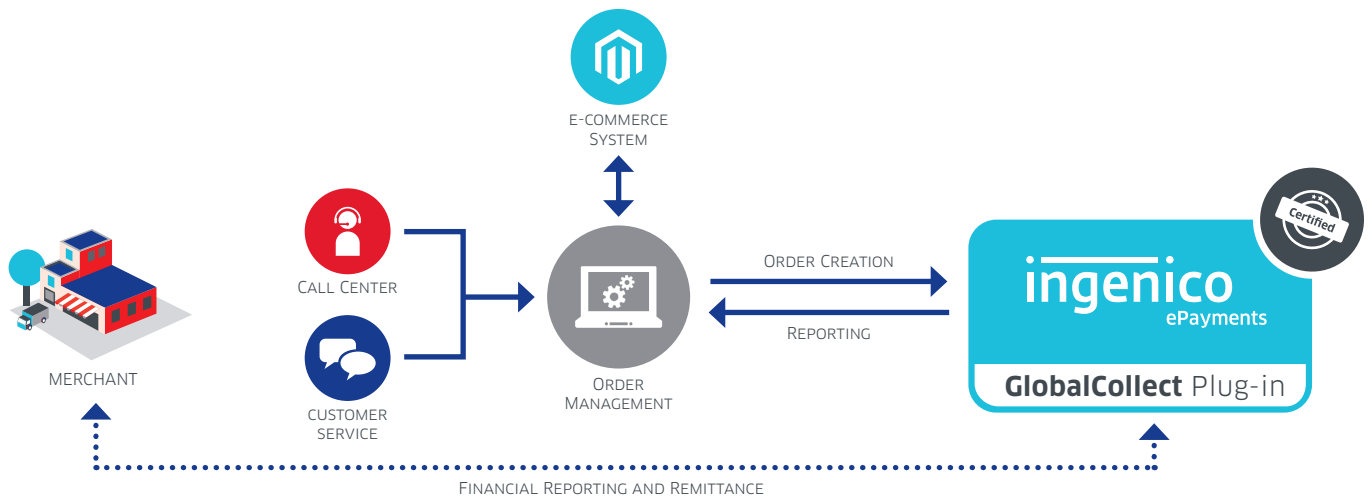

## **Speed and agility**

With intuitive applications for both business and technical users, your merchants, developers and operations teams are empowered to respond with speed and agility to new market opportunities and unforeseen consumer expectations. They can quickly execute omni-channel merchandising and marketing; manage operations globally; and develop unique capabilities and experiences that differentiate your brand.

## **Scalable, secure and reliable**

Whatever your expansion strategy, a secure technology backbone allows you to grow with confidence. State-of-the-art data centers across the globe are readily available for you to plug into. We ensure optimal performance, security and uptime even during seasonal peaks, so you can focus your resources on your strategic initiatives.

### Superior growth, superior economics

Launch new sites faster, across channels, geographies and brands without purchasing additional licenses and investing in more infrastructures to support your growth. Our pricing model is predictable, transparent and aligned to your business goals. This keeps us focused and accountable to your ongoing success. There are no hidden fees. No surprises. With a total cost of ownership that is half the cost of licensed software, the superior economics are clear.

### The cartridge

Ingenico ePayments contracted with system integrator "Smile Benelux" to build the cartridge. The Ingenico ePayments' interface is under continuing enrichment, adding new features, payment products and services. Currently supporting all payments products of the shelf, and responsive pages are on the construction roadmap.

### Implemented payment products:

- Visa
- Visa Electron
- MasterCard
- American Express
- JCB
- Maestro
- Discover
- Dinners
- PayPal
- iDeal
- Sofurt
- Überweisung
- giropay
- eCard Poland

### Integrated features:

- 3-D secure
- Fraud screening by ACI ReD
- Fraud screening by Ingenico ePayments
- Direct or delayed settlement
- Card on file/tokenisation
- Full service reporting
- Hosted solution (outsource PCI scope)
- Non-hosted solution
- Customer service payment status update
- Multi store support
- MOTO support

### Solution benefits

#### simple integration

A single pre build set of API's connects you to wide range of global and local payment methods and acquirers. Orders can be created from your web shop, mobile shop or call center.

### Secure

The connection is based on you not having to be PCI secure. Besides that, it contains holistic fraud tools, 3DS and IPID.

### Cost saving

The extension will save integration time since it provides a proven and certified pre-built solution. Furthermore it will empower customer service teams with integrated reporting and chargeback management.

### Supported versions:

- Magento Community Edition 1.8.x
- Magento Community Edition 1.9.x
- Magento Enterprise Edition 1.13.x
- Magento Enterprise Edition 1.14.x

### Future releases

There will be new releases of the extension. A new version can be uploaded into the Magento hosted environment by each individual merchant. The release of next new version can be triggered by:

- New applicable features at Ingenico ePayments
- New pre-programmed payment methods and/or pre-programmed payment products
- New Magento Enterprise Edition 2.0x in Q2-2016
