Questions and Answers:

Q: How can I activate the full MimioStudio™ license after the 30 day free trial?
A: Activating your MimioStudio license couldn't be simpler! You can activate the license by connecting any MimioClassroom product to your computer.

Q: Does the software and files work for countries outside the United States?
A: As long as you have the MimioStudio software downloaded and installed on your computer, you will be able to use the software and open any Mimio created file. You can download the MimioStudio software at http://mimio.com/support/downloads. The software is available for Windows, Mac, and Linux operating systems. You will be able to choose from an English version or Multi-language version. Languages currently supported can be found on the software download page.

Q: Where can I find my MimioConnect® password if I forgot it?
A: Just visit MimioConnect and on the top-right of the page where you login, you will see "Forgot Your Password?" Click the link and you'll be prompted to type in either your username or email address that your account is registered under. It is suggested to type in your email address in case you aren't sure of your Username. An email will be sent with further information to reset your password. If you have any other issues, contact us at training@mimio.com and we'll be glad to assist.

Q: Can you edit lessons found on MimioConnect?
A: Yes! This is the power of using teacher created lessons you find on the MimioConnect® online community without reinventing the wheel. Using a series of tools in the MimioStudio software, you can manipulate and modify anything in any lesson. Learn how to maximize the use of MimioStudio software in our MimioTraining™ Quick Learn sessions. Great sessions to learn how to edit include MimioStudio: Putting Instructional Design to Work, A Tour of MimioStudio, and MimioStudio: Formatting I.

Q: Can I view lessons with an earlier version of the MimioStudio software?
A: If you have an older version of the MimioStudio software, it will not open any file created with a newer version of the software. You will get a prompt indicating that the file was created in a newer version of the software. You will need to update your software to the latest version by visiting our Software Download page.

Q: How do I become a member of MimioConnect?
A: It's easy! Visit the MimioConnect educator community and click on "Click Here to Register" under the *Why Become a Member* section on the right. Enter some brief information about yourself; select a username and password, and you are set to explore all the wonders of the MimioConnect site. Learn more about how to maximize the resources of MimioConnect in our On-Demand Quick Learn recording.

Q: If I want to improve a lesson what would you suggest?
A: We have a number of resources available to support you along the way. Our Quick Learn training program offers a number of free training sessions, including "MimioStudio: Putting Instructional Design to Work". In this session, you'll learn some fundamental methods to increase interactivity and lesson development skills. Of course, practice makes perfect as you continue to explore what is possible. You could also reach out to our Ask a Master team on the MimioConnect community or even share your file and use a MimioConnect Forum to create a dialogue with other members for suggestions and tips. The power of the community can be harnessed using the expertise of all of the members.

Q: Can I import files I already have into the MimioStudio software, such as PowerPoint files?
A: You can insert a number of resources into the MimioStudio software, including other interactive whiteboard files. You don't have to start from scratch. Use the "insert file" ability of MimioStudio software to insert your existing Word, PDF, and PowerPoint files right into the software, and then add a few elements to make them interactive. Learn more about how to do this in our "MimioStudio: Adding Content" Quick Learn session.

Learning the tools and how to use them in MimioStudio software will make the process easier. Take advantage of the free training resources, including short video tutorials and Quick Learn sessions, which can be found at http://www.mimio.com/en-NA/Training/Overview.aspx.
