THE INDOOR & OUTDOOR ATHLETIC FACILITY EXPERTS DESIGN • NEW PROJECTS • RENOVATIONS • MAINTENANCE & REPAIR

THE IMPORTANCE OF AN ANNUAL MAINTENANCE PROGRAM

MAINTENANCE BENEFITS

- Protect and prolong your capital investment
- Satisfy your state building codes which require bleachers to be inspected yearly & maintained by manufacturers' standards
- Keep inspection reports on record
- Rectify existing safety/maintenance issues
- Minimize odds for possible lawsuits

ANNUAL MAINTENANCE ITEMS

- Basketball Backstops
- Indoor & Outdoor Bleachers
- Divider Curtains
- Overhead Volleyball Systems
- Batting Cages/Ceiling Suspended Cages

CONSIDER YOUR OVERHEAD AND MORE IMPORTANTLY WHAT'S OVER YOUR HEAD

Calvary Baptist Church had a six-foot pole disconnect from the ceiling of their divider curtain and fall to dangle midway down the curtain. The gym suddenly became a hazard. Toadvine was able to correct the problem before anyone was hurt, but routine maintenance could have prevented the incident altogether. We know the value in regular inspections—Maintenance for this divider curtain may have cost Calvary Baptist Church hundreds of dollars; but the task of correcting this emergency cost several thousand dollars, and nearly a catastrophic accident.

“ It is never a good thing to find out that you are going to have to close your gym because of an equipment problem—especially in the middle of basketball season. **TOADVINE RECOGNIZED OUR EMERGENCY & GOT US BACK AND RUNNING THE NEXT DAY.** Because of their quick response, our weekend basketball games as well as our Sunday gathering went on as if nothing had ever happened. ”

*Janet Saunders, Business Administrator
Calvary Baptist Church*

SEATING MAINTENANCE

Our professionals are up to date with the most current spectator seating state codes which ensure maximum safety for your spectators, faculty, students and coaches.

SEATING MAINTENANCE SERVICES:

- **Hands-on maintenance**
- **Regular, scheduled inspection**
- **On-site repairs during maintenance**

After each service, our team provides a comprehensive report as it relates to your seating condition and safety. Alongside this report, you receive a parts and cost list required to bring your bleachers up to code. We complete small repairs onsite during the time of the maintenance, to keep your costs low. Our crews have extensive backgrounds in facility equipment and seating and will leave your school with the peace of mind that your equipment is operating in a safe manner and at its full potential.

OUTDOOR SEATING

Exposure to mother nature, like wind, rain, snow and ice compromise equipment quickly, making regular maintenance and inspections vital. Toadvine's services help reduce the stress on your equipment caused by the elements and abuse from spectators. Loose bolts and brackets may seem minor until they are ignored, until a hand rail suddenly falls or a seat board collapses. Don't let a traumatic experience be the reason you call us!

INDOOR SEATING

Indoor seating is a prime candidate for annual maintenance and inspection because of the hundreds of moving parts and pieces. Most indoor seating is retractable, putting you at extreme risk of safety hazards. Even a bent guide rod can cause a chain reaction of events, increasing the repair cost to be two to three times greater than the annual maintenance fee—which would have identified the simple repair.

“ Toadvine Enterprises is a great company to work with here at Greater Clark County Schools. We are very pleased with the quality of workmanship that allows our events to proceed without interruption letting us create lifelong memories with a sense of pride in our facilities. From start to finish, the consultants at Toadvine are spectacular to work with and have **SOLVED OUR ATHLETIC EQUIPMENT AND BLEACHER ISSUES WITH PREVENTATIVE MAINTENANCE** throughout our elementary, middle school, and high school facilities.”

*Todd Givens,
Energy/HVAC Supervisor
Greater Clark County
Schools*

GYM EQUIPMENT MAINTENANCE

GET AHEAD OF EXPENSIVE AND DANGEROUS MISHAPS

All gym equipment should be inspected for operational safety, not just to see if it's working as expected. After each maintenance visit, you will receive a comprehensive report of our findings regarding wear and tear and safety concerns. Just like our seating maintenance program, Toadvine's regular visits will include the replacement and repair of miscellaneous nuts, bolts, screws, and hardware found missing, while onsite. Our maintenance services ensure your equipment receives the appropriate care while keeping the highest standard of safety.

Servicing equipment is similar to changing the oil in your car. If you ignore this routine maintenance item, your car could need a new engine without much warning.

BASKETBALL GOALS

Basketball goals have many moving parts. Since most basketball goals are retractable, they see more wear and tear, include intricate movement systems and therefore are a heavy mass of steel, aluminum and glass hanging from the ceiling. The cable systems, which retract the unit up and down from the ceiling, can shift over time and cause unnecessary strain on the cable and the support arms. Once goals shift out of line, anything from a snapped cable to a broken support arm can become a serious accident.

ADDITIONAL GYM EQUIPMENT MAINTANENCE

- **Divider Curtains**
- **Overhead Volleyball Systems**
- **Batting Cages/Ceiling Suspended Cages**
