

**Title**            **UX/UI Designer**

**Context**        Young high-tech, high-growth startup, seeking talent for critical roles to compete in the global market of pervasive wireless networking.

**Location**      Milan

**Duration**      Full time employment contract

Founded in 2010, the Milan-based startup Tanaza ([www.tanaza.com](http://www.tanaza.com)) developed and brought to market the first and only multi-vendor software for cloud management of WiFi Access Points and social hotspots. Since then our customer base and team have been growing at a rapid rate.

This is an exciting opportunity to work for a young and energetic start-up company with global customers.

#### **JOB SUMMARY**

The candidate will work in the Tanaza R&D Team in order to design UX and prototype UI using the latest cutting-edge frameworks.

#### **TECH REQUIREMENTS**

- Ability to design easy-to-use interfaces for cloud-based applications
- Ability to closely work at the hedge of UX and Front End Development
- Strong skills with AngularJS, Bootstrap, CSS is a big plus

#### **OTHER REQUIREMENTS**

- Ability to communicate and write in English
- Providing a great portfolio of projects is a big plus
- Being self motivated and curious
- Passion for technology
- Wish to pro-actively learn and grow
- Ability to take increasing levels of responsibility
