

New Roof Checklist

Everything You Need to Re-Roof Your Home

- Assess the condition of your current roof. Is it badly in need of repair or do you have more time to plan?
- Decide who will be installing your roof yourself. Will you hire a contractor or do it yourself?
- Decide on your budget.
- Determine all your roof measurements including roof pitch. Not sure how to measure your roof properly?
[Watch this quick video.](#)
- Narrow down your material and color choices, and check with your HOA to make sure your materials are approved.
- Get a quote for materials.
- Decide on a licensed and experienced contractor to tear off the old roof materials and install your new roof if you aren't going to install it yourself.

- Schedule a time with your contractor for work to begin and include this in your contract.
- Order and pay for your materials or have your contractor do this (if you're taking advantage of financing, you will need to pay for the materials).
- Schedule a time for pick up or delivery of materials to your house.
- Before the materials arrive, designate a clean and clutter-free work space.
- Clear a ten-foot space around your house and cover any landscaping to protect it from falling debris from the old roof tear-off.
- Enjoy your new roof.
