

BEROA ACQUIRES COMMONWEALTH DYNAMICS, INC.

Acquisition creates largest worldwide group of chimney and tower design builders

May 6, 2016 (Bilbao, Spain and Portsmouth, NH USA)

The acquisition of Commonwealth Dynamics, Inc. by Beroa Thermal Energy SL, a wholly owned subsidiary of Global Dominion Access S.A. of Spain, will expand the global reach of the organization to every corner of the globe.

Since inception in 1980, Commonwealth Dynamics has been responsible for the design and construction of some of the largest and most sophisticated structures ever built. Headquartered in Portsmouth, New Hampshire, Commonwealth will provide access into the North American market for the Dominion Group of companies.

Beroa and Commonwealth both service the global energy sector by providing tall structures for fossil fuel, nuclear, solar, and wind power generation plants. These structures include chimneys, solar towers, cooling towers, silos, pedestals for wind turbines, mega-structures, and other related equipment servicing energy production. The merging of technical expertise, specialized construction techniques and regional knowledge will allow us to provide a total set of solutions for our clients.

We look forward to continuing our commitment of providing the highest level of service to our North American and international clients.
