

Medicare Shared Savings Program

CMS has announced the dates for the next cycle of the Medicare Shared Savings Program ("MSSP"), providing an opportunity for new participants to join the shared savings program.

Now is the time to consider whether MSSP is the appropriate next step for your organization in its transition towards value-based care. MSSP provides healthcare providers with a vehicle for clinical care redesign aimed at improving the quality of care provided. Providers who may benefit from proceeding with an MSSP accountable care organization typically meet the following key criteria:

- Beginning the shift towards fee-for-value
- Multiple healthcare providers with the need to integrate efforts
- Fragmented care model
- High costs of care

Application Details

The Camden Group is one of the leading accountable care advisors in the country and has assisted many clients with successful MSSP applications, strategies for and implementation of ACOs, and overall readiness for risk arrangements, coordinated care, and clinical integration.

The application process involves multiple milestones, beginning with the Notice of Intent ("NOI") to apply, due by May 29, 2015. The application deadline is July 31, 2015 for a start date of January 1, 2016.

Our trusted advisors can guide you through the MSSP process, whether you are assessing if you should participate or have already decided to submit an application.

Contact our senior ACO/MSSP experts at (800) 360-0603, or visit thecamdengroup.com to learn more about our services.
