

**Omniplex is
your eLearning
Training Provider**

Training for eLearning Professionals:

Our courses were created to help you design, develop and deliver great eLearning

Our Articulate certified courses will teach you how to use your Articulate product to its fullest capacity. The course material delivered in our certified courses has been developed by Articulate themselves, so you know you are getting the best information directly from the source.

Also available are courses addressing every phase of the development process including instructional design, graphic design, working with subject matter experts and project management. These courses will help you develop the skills you need to create effective and engaging eLearning courses.

Articulate Certified Training Courses:

Articulate Storyline 2 (3 Days)

This 3-day training course provides professionals who use Articulate Storyline 2 with everything they need to create compelling eLearning content. With a series of lab exercises, this highly interactive workshop will introduce you to all of the tools and features Storyline 2 has to offer. Learn everything from the building blocks of Storyline 2 to some of the more advanced features like variables and conditions. These lab exercises will allow you to put into practice the key tools needed to build highly interactive learning modules.

Prerequisites: A moderate comfort level with Windows applications, as Articulate Storyline 2 is a standalone Windows-based application. Some lab exercises require Microsoft PowerPoint and Excel.

Articulate Studio '13 Pro (2 Days)

This 2-day training course provides professionals who use Articulate Studio '13 Pro with everything they need to create compelling eLearning courses. You'll receive hands-on exercises and real-world examples utilising the power of Articulate Presenter, Engage, Quizmaker, Replay and some of the more advanced and interactive features of PowerPoint. You will also have the opportunity to build resources that can be used when you return to the office.

Prerequisites: A moderate comfort level with the general operations of a computer, you should be able to create a PowerPoint presentation with custom animations, locate, move and copy files on your PC and learn user-friendly PC applications.

Omniplex Training Courses:

Introduction to Learning Design (1 Day)

Getting started with instructional design

eLearning opens up a world of possibilities but getting started can be a daunting task. This workshop will cover the fundamentals of instrumental design to ensure you get off to a flying start with your first eLearning projects.

Prerequisites: This course is for anyone new to developing eLearning and participants should come prepared to discuss a potential course they may have to develop.

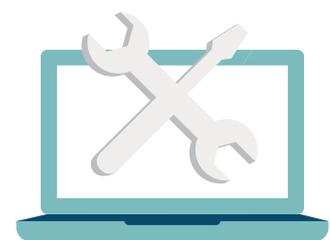

Advanced Learning Design (1 Day)

Building better learning

This workshop encourages any eLearning designer, content author or instructional designer to think beyond simple page-turning and how to develop an engaging and stimulating eLearning course.

Prerequisites: 1-day Omniplex Introduction to Instructional Design workshop or equivalent experience. Also should be knowledgeable with the eLearning development process and basic eLearning authoring tool skills.

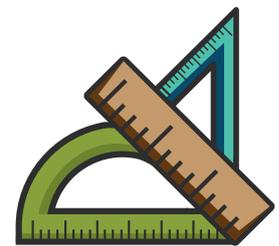

Introduction to eLearning Project Management (1 Day)

This course is for individuals who are new to project managing for eLearning. It covers writing a project plan, identifying the different stages of a project and minimising risk at each stage from the initial consultation to launch.

Engaging Effectively with Subject Matter Experts (SMEs) (1 Day)

For a learning designer, one of the critical skills in creating successful eLearning courses is the ability to engage with Subject Matter Experts (SMEs). This one day workshop provides a framework for working successfully with SMEs, enabling you to produce effective eLearning and blended learning.

Prerequisites: 1-day Omniplex Introduction to Instructional Design workshop. Knowledgeable with the eLearning development process and basic eLearning authoring tool skills.

About Omniplex:

Omniplex is an eLearning solutions provider, with offices located in London, Boston and Beijing, assisting thousands of organisations and industries worldwide with their eLearning initiatives. Omniplex offers content development services, training, consulting and software as well as additional solutions to provide you with the best eLearning tools.

“When I first started in eLearning, we’d been using Adobe for years. When we made the switch to Storyline, I realised that I wanted to learn even more about the software than the manual was able to teach me. After training for just two days with Omniplex, I was developing at a much faster pace. I really enjoyed learning about variables and conditions. The opportunities for developing eLearning are endless. All you have to do is think about what you want to accomplish and chances are, with a little help from Omniplex, you can do it”.

- Jo Lamontagne, Nottingham Building Society

“Training showed me how to use all of the features in Articulate Studio more efficiently. It opened up my eyes to all of the different options for making the learning more interactive for users.”

- Marian Paterson, Doosan
