

Helping a local business cook up better annual energy savings.

A smart program that's a fresh way to serve up savings on lighting costs.

The BX Bagel Factory, located in Wappingers Falls, NY, is a quaint local eatery serving fresh bagels, sandwiches, coffee, smoothies, and much more. While establishing its status as a highly rated town favorite, décor was just as important as quality baked goods. In order to both maintain this sharp environment and improve the restaurant's bottom line, BX Bagel Factory partnered with Lime Energy and program partner Central Hudson for some necessary LED lighting upgrades.

Following the completion of the energy efficient upgrades, BX Bagel owner Gabriel Guthartz found that he was saving money and the estimate given in the proposal was proving to be accurate. **"I was pleasantly surprised when I got my first bill in the mail not to mention how good the lights look in my store,"** Guthartz said.

After the guaranteed incentive from the utility and the interior LED upgrades, the BX Bagel Factory is now saving over \$3,000 annually and using 76.6% less energy to light the business.

Annual savings	\$3,297.00
Incentive paid	\$5,528.10
Measures implemented	Interior LEDs
Total project cost	\$8,178.42

Lime Energy — Helping organizations realize energy savings through energy efficiency.

Small businesses are the pillar of the US economy, constituting 90% of all commercial customers over the past 20 years.
