

Helping a local market find healthier ways to save on energy costs.

A smart program that's a natural solution to save on lighting costs.

Hyde Park, NY has a gem in the Earthgoods Market. This health food mecca has been providing locals with organic, natural health foods, products, and educational events since 1977. As a small business that thrives on the art of display, quality lighting is necessary, and having those measures be cost effective is crucial.

Earthgoods Market decided to upgrade to energy efficient LEDs with Lime Energy and program partner Central Hudson and not only saved over \$4,000 annually, but according to owner Clement Lau, **“the lighting was much brighter than expected.”** After the guaranteed incentive from the utility, interior LEDs, and annual savings, Mr. Lau was more than satisfied with the program and the over all process, **“Everything went well,”** he noted, **“the Project Manager was very responsive and helpful and followed up with me to ensure I had a good experience and was satisfied with the work done.”**

Annual savings	\$4,975.00
Incentive paid	\$10,996.73
Measures implemented	Interior LEDs
Total project cost	\$16,268.81

Lime Energy — Helping organizations realize energy savings through energy efficiency.

Small businesses are the pillar of the US economy, constituting 90% of all commercial customers over the past 20 years. Lime Energy is making waves nationally by providing clean energy solutions to businesses in 44 states. Over 100,000 small and mid-sized businesses have taken advantage of this great opportunity to improve their bottom line.
