

# TACTICAL RESPONSE VEHICLES. CHOOSE YOUR ULTIMATE LEVEL OF PERFORMANCE.

## PIERCE TACTICAL RESPONSE VEHICLES

When you choose a Pierce® Tactical Support Vehicle (TSV), you're choosing to build an apparatus around the needs of your department - not your neighbor's.

In listening to your apparatus requirements, Pierce helps determine if one of 500 standard compartment configuration lengths will meet these needs. If not, we will customize your apparatus, making a one-of-a-kind configuration for your specific application.

Your Pierce TSV can be configured on a commercial grade chassis or any one of five Pierce custom chassis, giving you a sole source vehicle build.

This customization and extensive option availability allows you to build an apparatus that meets your department's requirements today, as well as the service you demand in the future.

High performance comes from choice.

Choice comes from Pierce.

**Pierce Tactical Response Vehicles.**

# ENDLESS COMBINATIONS. UNLIMITED POTENTIAL.

## TACTICAL RESPONSE VEHICLES.
