

**MASS ACCUMULATION. MAJOR FRUSTRATION.
CLEAR IT ALL.**

H-SERIES XF BROOM RETROFIT KIT

The Oshkosh® H-Series™ XF Broom Retrofit Kit is built for the chassis that has outlived its broom. Providing an instant performance upgrade, the XF Broom Retrofit Kit easily fits on your existing H-Series chassis - providing the Oshkosh runway brooming performance you need in a low-cost, easy-to-install package.

TAKE BACK THE RUNWAY.

PERFORMANCE FEATURES

Heavy-Duty Construction

- High-performance broom for high-speed snow removal
- Cummins QSX 11.9 Tier 4i EPA compliant broom engine
- Active weight transfer option keeps weight on the front axle for improved overall handling of the chassis and broom
- Proven Oshkosh® mechanical cooling system

Oshkosh Command Zone Broom Control

- Optional Oshkosh SmartPattern system compensates for bristle wear to maintain consistent pattern
- Self recognition systems know when brooming occurs
- Optional ground speed control adjusts broom rpm based upon chassis speed
- Configured to fit each airport's demands

Smart Design

- 46 in. (1,168 mm) diameter broom available in 18, 20 and 22 ft. (5.5 m, 6.1 m and 6.7 m) lengths
- Interactive display with integrated joystick
- External broom positioning system located for safer, easier broom setup and maintenance
- Simple hydraulic system features clean hose routings and single point access for filter replacement
- Simultaneous multi-function broom operations allow broom to lift and rotate at once, reducing transition time at the end of the runway
- Electronic broom modules and components grouped in one easily accessible location
