

Microsoft Cloud-Based Solutions

Proof-of-Concepts and Production Deployments

Windows Azure

Windows Intune

Office 365

Considering the possibilities the cloud has to offer your organization? Let DynTek help you understand the benefits and value of Microsoft® cloud solutions today through Planning Sessions, Proof-of-Concepts and Production Deployments!

DynTek, a Microsoft Gold Certified Partner and National Systems Integrator, offers **Windows Intune, Office 365 and Windows Azure Cloud Proof-of-Concepts or Production Deployments** to help organizations like yours plan for and realize the benefits of Microsoft cloud-based solutions.

Throughout the course of these consulting engagements, your organization will start to develop a roadmap for cloud-based services and get a comprehensive overview of Microsoft's cloud offerings such as Windows Intune for Systems Management, Office 365 for Exchange, Lync and SharePoint in the cloud, or the Windows Azure platform for data and infrastructure-as-a-service.

Choose from one of three different 3-day Proof-of-Concepts covering Windows Intune, Office 365 and Windows Azure or ask about our custom tailored cloud planning service engagements and production deployment services.

- **Windows Intune** - Learn about Microsoft Windows Intune and what Microsoft offers in terms of cloud-based management capabilities to inventory your IT assets, deploy software, and patch and monitor your infrastructure.
- **Office 365** – Learn what Microsoft's Office 365 platform has to offer in terms of cloud-based software-as-a-service and realize the benefits of moving to Exchange, Lync and SharePoint in the cloud.
- **Windows Azure** – Learn what Microsoft Windows Azure is and how your organization can benefit from Azure data and infrastructure services to increase the agility and elasticity of your IT infrastructure and operations -- ranging from disaster recovery to big data scenarios and Azure virtual machines.

Proof-of-Concept: 3 Days

- Interactive planning session focused on one of the following cloud-based solutions:
 - o Windows Intune
 - o Office 365
 - o Windows Azure
- Cloud roadmap planning session and requirements gathering:
 - o Administration requirements
 - o Security and compliance considerations
 - o Backup/Recovery considerations
 - o Availability requirements
 - o Other organization specific needs
- Overview into the features and functionality of the cloud solution
- Cost analysis of on-premise versus cloud
- Setup of online limited Proof-of-Concept
- Summarized roadmap planning document detailing findings and next steps to get your organization to the cloud

Production Deployment

- In addition to proof-of-concepts, DynTek offers comprehensive design, planning and deployment services for production implementations of:
 - o Windows Intune
 - o Office 365
 - o Windows Azure
 - o Active Directory Federation Services
- Active Directory Federation Services to enable single sign on "SSO" scenarios
- Migration services to transition your data to the cloud
- Hybrid solutions combining on-premise private cloud and public cloud-based solutions
- Customized operational plans and workshops covering private and public cloud
- Knowledge transfer and training offerings to get your team up to speed on private and public cloud solutions

DynTek -- Microsoft Platform Solutions

DynTek has developed industry based methodologies to address the Analysis, Design, Proof-of-Concept, Project Planning, Full Scale Deployment and Operations of a broad range of Microsoft® based solutions. We create solutions that focus on helping our customers realize the greatest value from their existing Microsoft software investment.
