

# Move to Modern: XP to Windows 7/8 Migration Solutions

Microsoft  
System Center

**The time is now.** The time to take advantage of migrating from the Windows XP platform to Windows 7 or 8. The newer versions of the Windows operating system provide greater security, reliability, manageability and user experience. Organizations will find a wide range of innovations and enhancements to help them improve productivity with Windows 7 or 8. In addition, Windows XP is reaching End of Support on April 8, 2014, so it is critical for organizations to start the migration process now.

DynTek has extensive experience helping organizations improve their IT infrastructure, secure their environment, enhance communication and collaboration and meet reporting requirements.

We help organizations seamlessly categorize current applications, assess application compatibility, and move users (along with their data) from Windows XP to Windows 7/8. DynTek's team of highly certified consultants will review best practices, deployment methods, virtualization options and deployment tools, (and pitfalls) that will successfully guide your organization's transition from Windows XP to Windows 7/8.

- **Deep dive and analysis to determine how Microsoft's package-based imaging tools can save time (and money) over sector-based imaging**
- **Optimize the Deployment with the Microsoft Desktop Optimization Pack**
- **Identify & Remediate Application Compatibility**
  - o Generate Application Inventory
  - o Evaluate and mitigate application compatibility issues before deploying Windows 7/8 with the Microsoft Application Compatibility Toolkit
  - o Remediate compatibility issues with Microsoft App-V, MED-V & VDI
  - o Reduce application migration risk and ensures application readiness with ChangeBASE
  - o Accelerate application deployment and make better implementation decisions with Citrix App DNA
- **Desktop Virtualization**
  - o Deliver a consistent and personal Windows experience through Microsoft User Experience Virtualization (UE-V)
  - o Enable anywhere access to applications that are dynamically available on any authorized PC without application installs – online or offline through App-V
- **Deployment/Migration Tools & Pathways**
  - o Microsoft Deployment Tool
  - o User State Migration Tool
  - o Microsoft Deployment Toolkit (MDT)
  - o Windows Automated Installation Kit (AIK)
  - o System Center Configuration Manager 2012

## DynTek -- Microsoft Platform Solutions

DynTek has developed industry based methodologies to address the Analysis, Design, Proof-of-Concept, Project Planning, Full Scale Deployment and Operations of a broad range of Microsoft® based solutions. We create solutions that focus on helping our customers realize the greatest value from their existing Microsoft software investment.
