

**More than
a business.
More than a job.
A passion.**

TALENT ACQUISITION & Staff Augmentation Solutions

Finding the right person to join your team can be challenging. You want someone with the skill set, personality and work ethic to make them a cultural fit within your organization. And then there are the times when you just simply need someone...now!

Talent Acquisition and Staff Augmentation is a people business...and therefore one size does not fit all. DynTek takes the time to find out your needs and requirements up front to ensure we understand all the nuances that will go into the 'right fit'. No cookie cutter forms to fill out...we focus on having a conversation.

Our team has extensive experience both sourcing candidates and hiring them. We understand the pain of working with most staff augmentation firms and have vowed to create a unique experience when dealing with DynTek. We are committed to being responsive, only presenting qualified candidates and following up to ensure your complete satisfaction.

Whether you are looking to hire one technical resource or staff an entire team, DynTek has the experience creating customized recruitment plans, including:

- **Temp, Temp-to-Hire and Direct Hire Placements**
- **Complete background checks to ensure all employees are thoroughly screened before they start their assignments**
- **Technical screening -- Our in-house team of engineers will screen all candidates for their technical acumen**

We pride ourselves on being different from other vendors -- caring more, trying harder, and taking things more personally. This business isn't just about our jobs...it's about our passion. If you are looking to step outside the mainstream and be more than a Customer ID number, contact DynTek today!

TALENT ACQUISITION & Staff Augmentation Solutions

THE DYNTEK DIFFERENCE

- We focus on creating a partnership based on an understanding of your corporate goals, culture and business challenges
- Our team takes the time to learn about your company, analyze your procedures, and provide staffing solutions that fit your business and technical requirements
- Our accuracy to your requirements is our highest priority
- Follow through and delivery of the right resource at the right time, every time
- Our ability to work with your budget through flexible pricing models
