• There are two ways to upload files to our site. If you have the latest Java installed then you can use the drag and drop method for uploading the files. If you are unsure if you have the latest java then you will need to use the "Browser Uploader" method.

Drag and Drop Method

• Select the file or files you wish to upload and drop them on to the area just below the menu bar. A yellow bar will appear when you are over the proper area.

• You will receive a message once everything has been uploaded.

Browser Uploader Method (non-java)

- The second way to upload the files is via the "Browser Uploader".
- This is where you select the files individually via a window instead of dragging and dropping the files onto the upload area.

• You will receive a message once everything has been uploaded.

~ Downloading Files ~

- To download a file.
- Check the box to the left of each file you wish to download. Click on one of the files and the files you have chosen will be automatically compressed downloaded to your default download directory.

• After all files are uploaded you can then logout by using the "Logout" Button.
