

| IDEAL FOR PCBA THROUGH SYSTEM TESTING |

# Flexible Wearables Platform

Accelerate your device testing with our powerful Wearables platform featuring best-in-class instruments, built-in test plans, adaptable nests and more.

› **Test a wide range of wearable devices:**

**Lifestyle:** Fitness bands, smart watches, headgear

**Health:** Monitors (heart, glucose, oxygen, etc.)

**Work:** Head-up displays, smart glasses, clothing

› **Validate numerous core functions like:**

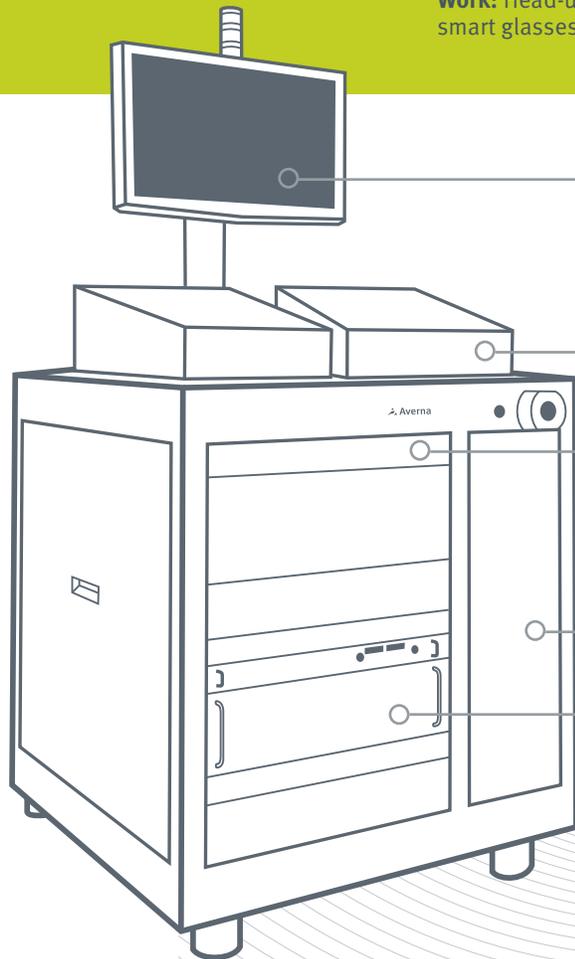

WiFi, Bluetooth, GPS receivers

Temperature, humidity, light sensors

Speakers, microphones, displays

› **Capture and store complete test results**

› **Perform quick changeovers for other products**

**AUTOMATED TEST PLANS**

Optimize throughput and minimize manual handling

**ADAPTABLE NESTS AND FIXTURES**

Support many types of UUTs and multi-up testing

**PREDEFINED TEST PROGRAMS**

Cover 80% or more of standard device testing

**INDUSTRY-STANDARD ARCHITECTURE**

Extend value with easy HW/SW upgrades

**FLEXIBLE TEST INSTRUMENTS**

Enable wide test and measurement coverage
