

The best hotel management system
for independent hotels

InnRoad is an all-in-one, cloud-based property management solution for independent hotels.

With innRoad, you can now **control your front desk and back office operations all within one system**. With instant online access, comprehensive reporting and top-of-class customer service, innRoad takes the difficulty out of managing hotels, allowing owners to get back to the most important part of their business – their guests.

Stay in front of your guests, not behind the desk

Running a hotel is hard enough without having to worry about your property management system keeping you stuck at a computer screen. **innRoad manages the entire process** for you, from the customer's reservation and room distribution to housekeeping and billing. There's no need to complicate your business by using multiple tools to manage your hotel – innRoad takes care of everything in a single system.

Global distribution for maximized profits

You know that attracting new guests is key to growing a successful hotel business. innRoad's global distribution services will connect your property to a network of partners who are focused on generating bookings and driving revenue for your property. innRoad is also **the only solution that offers true two-way connectivity** between your hotel and these online travel agencies. Anytime a reservation is made on an OTA, it is reflected immediately in your reservation system. Simply set your rates, choose the number of rooms available and your work is done. innRoad removes the need for third-party applications.

“Since we started with innRoad, occupancy rates are up 3.4% and our revenue is up 20%”

Michael Wudyka - Owner
Enclave Inn

“innRoad easily supports my two locations. With it being **cloud-based**, we don't have to install anything in two different places, and I can check-in on things wherever I am.”

Ladan Monshizadeh
Warm Sands Villas

Access your hotel where and when it's convenient

We know that hotel operators rarely spend an entire day at the front desk. This is why innRoad offers a cloud-based property management system that is **securely accessible from anywhere with an internet connection**. You shouldn't have to be tied to your hotel 24/7, but you should be able to figure out what's going with your property wherever you are.

Improve efficiency in your operations

Customize innRoad to meet your needs by setting up your system to **manage your properties at one or multiple locations**. Use one login for all properties, or access each separately for maximum customization and permission sets.

Peace of mind for your hotel property

We know that not every property is the same, and that each customer we meet has unique needs and requirements for their hotel management software. That's why innRoad works to make sure you and your hotel are prepared for any situation. **Our team is available 24/7** to ensure that your hotel management software works for you, and not the other way around.

"Having innRoad is like having another employee. With the time we save we can spend more time with the guests, making sure they have the best experience possible."

Steve Soldatovich - CEO
SolVen Hospitality

Trusted by thousands of independent hoteliers

"We couldn't have made a better choice! The innRoad system is very user-friendly and there is always help available when needed."

Cheryl Elkins
Florence Elston Inn, VA

"The channel management features got us quickly online with major OTAs... we are up 73% in sales over the same time period in the previous year!"

James Feagin
Echo Lake Lodge, ME

"You will be very happy... Our Resort is #1 rated on TripAdvisor - I would not risk that by using any other reservation system."

Bob Hickernell
Sea Spray Resort, FL

"There aren't any processes that are complicated or redundant... hands-down one of the very best software experiences I've had."

Dee Burdett
Pioneertown Motel, OR

"This system is close to perfect for our small inns... definitely the best on the market."

Julia Harvey
Salt Hotels, MA

"We reviewed many systems and found innRoad to be the perfect partner."

Alli Baldwin
Roux, MA
