

# COMPANY OVERVIEW

BioCatch is a leading provider of Behavioral Biometric, Authentication and Malware Detection solutions for mobile and web applications. Available as a cloud-based solution, BioCatch proactively collects and analyzes more than 500 cognitive parameters to generate a unique user profile. Organizations use the platform to continuously authenticate users during their online sessions, protecting against cyber threats and fraudulent activity, such as account takeover and RAT-in-the-Browser (RitB). Additionally, BioCatch has collaborated with Early Warning in securing and optimizing digital financial transactions through shared behavioral intelligence.

## AT A GLANCE

Founded in 2011

**Kevin Donovan**, Vice President of Sales, Americas  
**Chilik Hochberg**, Senior Director, Customer Success

## OUR SOLUTIONS

### Behavioral Authentication

Our behavioral authentication platform helps organization protect their online customers by creating a behavioral signature for each genuine user, fraudster or a threat. This signature follows the user each time he logs-in and matches it with his existing signature in the data base.

### Malware Detection

Our Malware detection capabilities can identify MitB, robotic activity, spoofing and Rat-in-the-Browser in real time by recognizing the unique characteristics of these different threat types.

### Fraudulent Activity

BioCatch's E-commerce Fraud Detection identifies fraud typically missed by existing fraud detection controls. It spots suspicious behaviors consistent with fraud and criminal activity, including repeat fraudster access, data familiarity 'mismatch', account takeover practices, device and network spoofing , and inauthentic profile behavior.
