

BioCatch Invited to Speak at Web Summit, Europe's Largest Tech Startup Event

Tel Aviv, IS—October 28, 2015--- [BioCatch™](#), the global leader in behavioral authentication and malware detection, announced today that it has been invited to speak on stage during the 2015 [Web Summit](#), Europe's largest tech startup event.

BioCatch's CEO, Ron Moritz, will speak on a panel moderated by James Ball of the Guardian entitled, "The Security Elephant in the Room," at the Money Stage on November 5th at 11:20 am (IST) alongside Pat Phelan Co-Founder and CEO of Trustev and Phillip Dunkelberger CEO of Nok Nok Labs.

Web Summit, set to take place in Dublin from November 3rd-5th, is an annual technology conference centered on Internet technology drawing attendees ranging from Fortune 500 companies to the world's most exciting tech companies. Over 30,000 guests will attend the conference, which has gained acclaim as one of the world's premier tech gatherings.

"BioCatch detects behavioral anomalies that indicate both account takeovers and the presence of malware, without creating any friction for end users, and Web Summit is a great opportunity for us to share our expertise with the wider industry and engage in dialogue with other leaders in the field," said Moritz.

The company recently launched its cutting edge RAT-in-the-Browser (RitB) detection campaign, which utilizes the power of Behavioral Biometrics technology to detect malware in the act.

About BioCatch

BioCatch is a leading provider of Behavioral Biometric and Authentication solutions for mobile and Web applications. Available as a cloud-based solution, BioCatch proactively collects and analyzes more than 500 cognitive parameters to generate a unique user profile. Banks and eCommerce websites and mobile apps use BioCatch to significantly reduce friction associated with risky transactions and protect users against cyber threats, such as Account Takeovers, Man-in-the-Browser (MitB) Malware and Remote Access (RAT) attacks. Additionally, BioCatch provides an enterprise tool that improves the employee authentication experience while protecting access to critical IT assets. The Company was founded in 2011 by experts in neural science research, machine learning and cyber security and is currently deployed in leading banks, eCommerce sites and enterprises across North America, Latin America and Europe. About Web Summit

Web Summit is an annual technology conference held in Dublin, Ireland since 2010. The topic of the conference is centered on Internet technology and attendees range from Fortune 500 companies to the world's most exciting tech companies. This contains a mix of CEOs and founders of tech start ups together with a range of people from across the global technology industry, as well as related industries. Web Summit is run by Ci, a company that runs events throughout the world including founders Dublin, RISE in Hong Kong, Collision in the US and MoneyConf in Belfast. In September 2015 Paddy Cosgrave, Web Summit co-founder and CEO of Ci, announced that Web Summit would be held in Lisbon starting in 2016.
