

BioCatch Named Winner of Two Prestigious Technology Awards

Capturing high interest with its behavioral biometrics technology

Tel Aviv, Israel—May X, 2015-- BioCatch, the global leader in Cognitive Biometrics™, Authentication and Malware Detection, was recently recognized for the MRC Emerging Technology Awards (METAwards) as well as the Red Herring Europe Award.

The Red Herring Europe Award of which BioCatch was recognized in the security category, is an award that celebrates the fastest growing and most innovative private companies across Europe. BioCatch is also a finalist for the Red Herring North America Award.

In March, BioCatch was also honored at the METAwards and named winner of the Established Category, recognizing leadership and initiative in eCommerce payments and fraud. With the ability to analyze over 400 different behavioral parameters, BioCatch's technology can detect fraud and quickly differentiate between genuine customers and fraudsters.

This month, BioCatch will attend and present at the FS-ISAC Annual Summit in Miami Beach, FL from May 17-20th. The conference is focused on technologies that allow for effective cybersecurity information sharing within the financial services sector. BioCatch will present a case study at the event showcasing how their technology can detect malware attacks through behavioral biometrics. At the event, BioCatch will be sharing a booth with Early Warning following the success of their recent partnership to discuss their collaboration.

Additionally, BioCatch will be attending the MRC European Congress in Brussels, Belgium from May 20-22nd, where the company will be presenting their eCommerce solution as well as moderating a round table entitled: " Discussion Table: Biometrics or Machine Learning."

About BioCatch

BioCatch is a leading provider of Cognitive Biometrics™, Authentication and Malware Detection solutions for mobile and Web applications. Available as a cloud-based solution, BioCatch proactively collects and analyzes more than 400 cognitive parameters to generate a unique user profile. Banks and ecommerce websites and mobile apps use BioCatch to significantly reduce friction associated with risky transactions and protect

users against cyber threats, such as Account Takeovers, Man-in-the Browser (MitB) Malware and Remote Access (RAT) attacks. Additionally, BioCatch provides an enterprise tool that improves the employee authentication experience while protecting access to critical IT assets. The Company was founded in 2011 by experts in neural science research, machine learning and cyber security and is currently deployed in leading banks across North America, Latin America and Europe.
