PERSONAL SCANNING WITH PINPOINT SCAN.
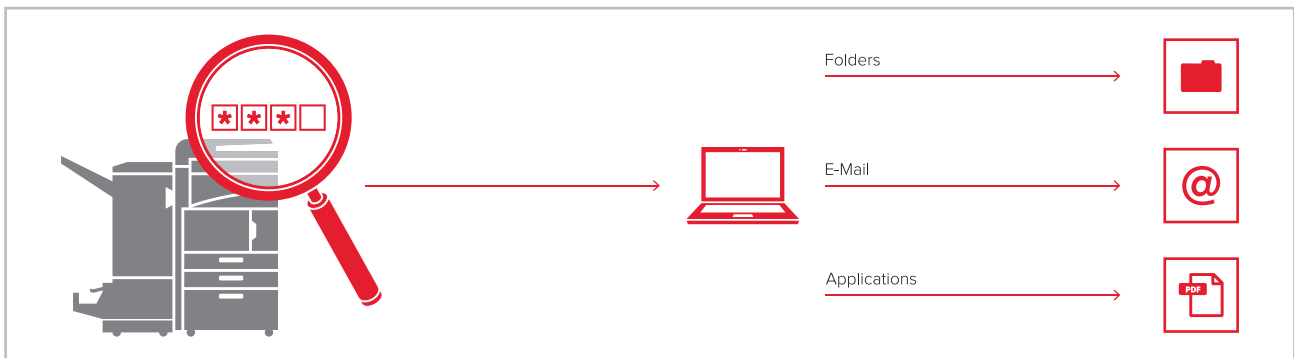

THE HYPAS™ APPLICATION TO SPEED UP YOUR SCAN WORKFLOWS.

Nowadays, many offices use MFPs rather than desktop scanners to turn their printed documents into digital files. While being fast, efficient and powerful, most MFPs lack an easy-to-use system to scan documents to a selected destination on your PC. This is where our new HyPAS™ application PinPoint Scan comes in. PinPoint Scan allows you to define your own scan destinations, whether it's a folder on your PC, your email address or an application that supports the PDF file format. Scanning won't get any easier than that!

Folders

E-Mail

Applications

BUSINESS CHALLENGES

> The MFP only scans to email – **How can I scan documents directly to the folders or applications where I need them?**

> Many people find MFP scanning difficult – **Is there a way to make scanning more intuitive?**

> I frequently scan documents that I need to edit for further processing – **Could this process be accelerated?**

YOUR ADVANTAGES WITH PINPOINT SCAN

> **Easy Selection:** The personal destination folders are displayed directly on the control panel of the MFP after the user has logged in.

> **Intuitive Setup:** PinPoint Scan has an intuitive menu structure and is very easy to use.

> **Scan to application:** With PinPoint Scan you can send your document directly to an application that supports PDF files and start editing it immediately.

HYPAS™ – TAILOR YOUR MFP TO YOUR BUSINESS

HyPAS™

HyPAS™ is KYOCERA's platform to develop custom MFP business applications. These can run embedded inside the device and extend the device functionality according to your needs. The MFP applications can connect to external server applications and integrate the MFP into your company workflow. With HyPAS™, KYOCERA comes up to your individual requirements and provides you with the right solutions for your business.

FEATURES & SPECIFICATIONS

With PinPoint Scan you can define your own scan destinations, whether they are folders on your PC, an e-mail address or even an application that is automatically opened. PinPoint Scan is remarkably easy to set up: first, install a small application on your PC, then define your personal PIN code and preferred scan destinations. On the MFP simply enter your PIN code and immediately see all your previously defined scan destinations directly on the panel. You can also browse the folders of your PC directly from the control panel of the MFP and directly scan into the right folder. The scanned data undergoes an SSL encryption before being sent from the MFP to your PC to ensure its security during the whole scanning process.

Scan to folder – Save the scanned file directly on your desktop or in any folder on your PC.

Security – Login with personal PIN code or ID card, secure data transmission with SSL encryption.

Scan to email – Simply send the scanned document in a new email to your email address.

Personal setup – Users can define and change their personal scan settings by themselves in a user-friendly menu.

Scan to application – Send the document to applications supporting PDF files.

Fast and easy – The intuitive installation and interface guarantee that anyone can operate the application without difficulty.

FROM SCANNING TO WORKFLOW

KYOCERA offers a wide range of applications to streamline scanning for any business from small to large. With Pinpoint Scan, users can easily scan to their PC which makes scanning faster and easier. Other solutions offer OCR, barcode recognition and advanced features for workflow automation. Talk to KYOCERA to find out how we can improve your efficiency and save costs.

SYSTEM REQUIREMENTS

> HyPAS-enabled/capable KYOCERA MFP.
> Microsoft Windows 7/Vista/XP.
> Apple Mac compatible with OS 10.5 or higher.

Please find the complete list of compatible devices at www.kyoceradocumentsolutions.eu
