# Smart delivery of current awareness

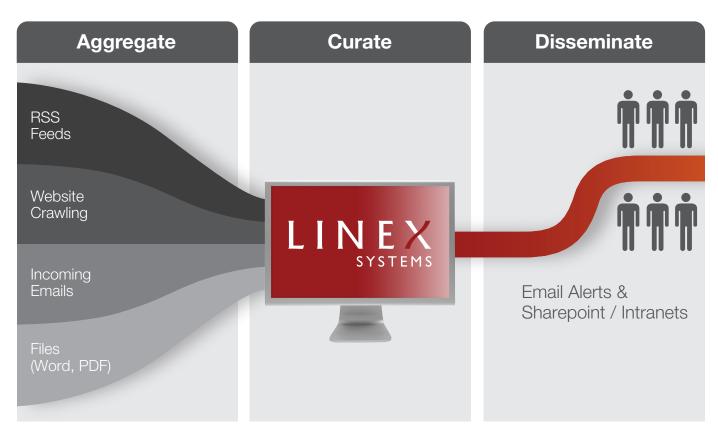

### What if all your content lived in one place?

You could manage thousands of information sources across multiple locations You could track the consumption of every subscription

You could take control of your current awareness

And work smarter

Automate the aggregation, curation and dissemination of current awareness within your firm...

Linex combines open source technologies with intuitive, cloud based delivery tools to help information professionals, business analysts, and marketing teams **make information work for them** – not the other way around.

# Smart delivery of current awareness

#### Do more

Automate routine tasks and lift your administrative burden. From creating email alerts to sifting through search results, Linex does the heavy lifting so you can focus on what's important – curating content and informing your subscribers.

#### Save more

Cut costs and improve your bottom line. Linex helps you process more quality content in less time, which boosts efficiency and reduces the overall expense of managing information. Linex helps you identify sources that are not being used, potentially making decisions to cancel them.

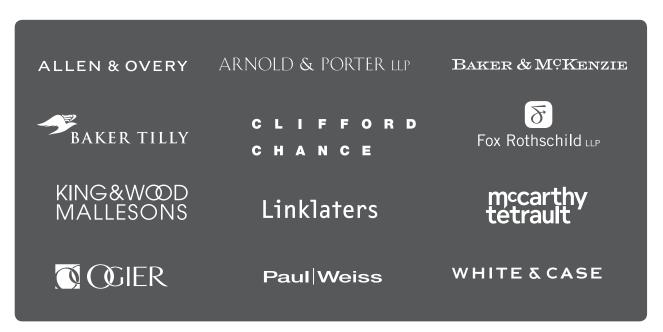

#### Know more

Consolidate information streams and broaden your knowledge base. Linex gives you a central hub for managing all incoming and outgoing content, so it's easier to stay organised, informed, and in control.

#### Get more

Adapt Linex to your process and workflow demands. Our agile development team delivers custom enhancements that suit your approach, so the platform can evolve as your business grows.

### Happy clients say it best

Clients love our features, but that's just the beginning. They also appreciate our flexibility. Rather than push a one size fits all solution for current awareness, we adapt Linex to meet each client's unique objectives. Long story short: you tell us what Linex should do, and we make it happen.
