

KJM Wireless Communications, Inc. is excited to announce the divestiture of its assets, **Two-Way radios.com** and **Communications Express**. Operating as a single unit ("KJM") (Communications handling system sales, installation and maintenance;

Two-Way handling internet product sales), **KJM** specializes in the sales, repair and rental of portable and mobile (vehicle-mounted) 2-way radios, base stations and repeaters, as well as the sale of batteries, parts and accessories. It also installs in-building communications systems for two-way radios and cell phones. KJM's clients include construction companies, federal and local governments, school systems, property management firms, security companies, maintenance companies and many other entities that have a need to maintain contact with mobile employees.

With revenues in the \$2 million range, KJM has an installed base of over 35,000 radios (each one with either a Two-Way radios.com or a Communications Express name and phone number sticker) and approximately 2000 active clients. Repeat business as a percentage of sales has grown steadily and accounts for approximately 75% of revenues.

The buyer, **Communications Express, LLC**, has seasoned industry professionals on its Board of Directors and is excited about adding Communications Express and Two-Way radio.com to its family of companies. The buyer believes that with its industry expertise, it can continue and expand on KJM's history of success.

Prime Investments acted as intermediary in the transaction. Prime Investments also acted as intermediary in KJM's prior acquisition of the company from Communications Express, Inc.
