

NEED EXPERT LABELING FOR MEDICAL DEVICE PACKAGES AND COMPONENTS?

COMPUTYPE IS THE HEAD OF THE CLASS

You make Class II or Class III medical devices. You don't need to be told that unique barcode identification for devices, component parts and sub-assemblies is critical.

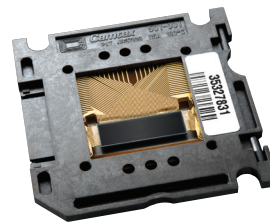

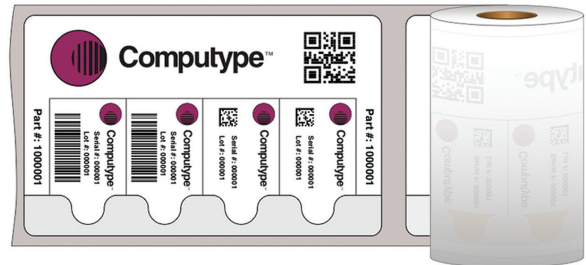

Computype has spent more than 40 years creating barcode identification systems where the difference between accuracy and error can be the difference between life and death. Our labels have been the standard-bearer for the North American blood supply since the earliest days of barcode technology.

We make identification solutions designed to excel in the toughest conditions under the most exacting requirements, such as tight placement tolerances and strict regulatory environments.

UNIQUE AND ACCURATE IDENTIFICATION, EVERY TIME.

Our medical device package and component labels are high-performance and reliable so you can count on what matters most: accuracy. We specialize in:

- › Automation for print-and-apply needs with tight placement
- › Sequence integrity
- › Custom-engineered label solutions to meet sterilization requirements
- › FDA-compliant adhesives
- › Intricate die-cutting, adhesive deadening, and label tabs for easy removal
- › Variable and sequential color
- › Vision-based inspection system for 100% scannability of pre-printed labels
- › Piggyback adhesives

SAVE LIVES, SAVE TIME, SAVE MONEY.

Computype's expertise in labeling medical device packages and components makes it easier to do your job more efficiently and more accurately.

MEDICAL DEVICE LABELING REQUIREMENTS ARE DEMANDING.

But that's no reason your label system should fail. We've spent the past forty years putting our labels and adhesives through endless tests to prove they'll remain durable even in the most severe conditions.

WE'D LOVE TO HEAR FROM YOU.
