

# GET YOUR BLANK LABELS ANY WAY YOU NEED THEM.

ISBT 128 BLANK LABEL STOCK

If your label vendor is offering only one material choice, do you really have a choice? Computype, the largest and most trusted blood label supplier in the country, has plenty of choices of blank labels in stock and ready to ship. No matter what printer or software you use -- Sato, Datamax, Zebra... Wyndgate, MEDITECH, BBCS -- we have competitive pricing on multiple materials. Of course, all are compliant with US FDA 21 CFR 175.105.

Here's a sampling:

- > TS864: 2.6 mil glossy polypropylene film (-65°F to 200°F), good tear resistance; good initial tack and ultimate adhesion to blood bags and tubes
- > TS933: 4.2 mil polypropylene film (-65°F to 200°F), great dispensability; good low-temperature performance, resistance to UV light, water and plasticizers
- > TS577: 3 mil low cost paper (-65°F to 200°F), good initial tack and adhesion to paper and plastics; short repositioning time to correct misplaced labels

## SAVE LIVES, SAVE TIME, SAVE MONEY.

There's a lot of pressure put on the labels you use. If they don't perform well when it comes to readability, trackability and just hanging on, there's more at stake than just a missing label. With adhesives and materials that can withstand harsh environments, and barcode encodation that's been checked and double checked, Computype's got you covered with products that perform.

## LOOK TO US FOR ALL YOUR CRITICAL LABELING SOLUTIONS.

We work closely with you to provide the right labels to meet all your requirements. And not just the right labels, but everything for your labeling needs. From labels to printers, and scanners to label replication systems, Computype offers this and everything in between.

## WE'D LOVE TO HEAR FROM YOU.

Please feel free to contact us directly, or your Regional Sales Manager, if you have any questions about any of our services or capabilities, or for more details on our blank label stock program.
