

# Huddle Room

## CRESTRON .AV FRAMEWORK™

**The huddle room is a smaller room or breakout space with a table, phone, display and whiteboard. It's the ideal location for people who just need a quiet place to get together and collaborate.**

It's designed for groups of two to eight people to work comfortably. The huddle room is the most common space built in today's enterprise and is designed to fit the needs of the modern office worker. While rooms of this type have been built for many years, only recently are organizations realizing the necessity of adding technology to these rooms.

# Huddle Room

## CRESTRON .AV FRAMEWORK

### This newer room style:

- > Encourages essential teamwork
- > Provides a space for quick deliberation
- > Increases productivity

### This room needs to support the following functions:

- > Share content wirelessly from a tablet, smartphone or laptop
- > Present in the highest resolution video formats
- > See the availability of the room and book it if needed
- > Real-time monitoring and troubleshooting of room's technology by IT

Crestron has designed this room to meet all of the above needs, in an economical, simple, scalable way. This is Crestron's huddle space solution for elevating productivity in smaller rooms.

### Key Products

Qty	Product ID	Product	Preview
1	PP-100	PinPoint™ location beacon	①
1	TT-101-B	Table top connectivity solution	②
1	AM-100	AirMedia™ wireless presentation solution	③
1	DM-DGE-200-C	Digital graphics engine	④
1	DM-TX-201-C	HD transmitter	⑤

#### PP-100

PinPoint™ enhances the intelligence and personalization of your Crestron® system by enabling your iPhone® or iPad® to always know what room you're in.

#### TT-101-B

Crestron Connect It™ offers a cost-effective, simple-to-use presentation solution that provides plug-and-play connectivity, cable management, and one-touch control.

#### AM-100

The only enterprise-grade wireless presentation solution that is guaranteed not to interfere with existing Wi-Fi® infrastructure, support standard network protocols, and control whose content is displayed.

4

**DM-DGE-200-C**

The ultimate room box features streaming H.264 video, 4K over HDBaseT<sup>®</sup>, and HDMI<sup>®</sup> inputs, transmits 4K over HDMI, delivers customizable 4K onscreen graphics and dynamic text, display control, and direct connectivity with Crestron Fusion<sup>®</sup>.

5

**DM-TX-201-C**

Provides connectivity for HDMI and RGB sources, and transmits HD long distance over HDBaseT<sup>®</sup>.

## Crestron PinPoint Mobile app

### Find a room anytime you need one

The new Crestron PinPoint™ Mobile app makes enterprise technology a personal tool that you carry in the palm of your hand. Now, you can find and book any type of space you need with a few swift clicks on your phone.

### A warm, welcoming experience

When entering the room you're presented with the PinPoint Room Experience on the main display which tells you the schedule of the room and ways to present in the space. No longer are you faced with a blank screen and frustrated that you can't figure out how to use the room.

The room interface also provides a clear indication of whether the space is available, and gently reminds you when your meeting time is almost up.

### Smart wireless presentation

You can present wirelessly on the room display from virtually any smart device using Crestron AirMedia™. Using PinPoint location beacons, your smart device also knows which display you're near and will present your content on that display with one button press.

### No-compromise 4K video

You can present in the room from a wired laptop source using VGA, DisplayPort or HDMI® and get zero-latency beautiful video on the screen at up to 4K resolution. Your investment in the room is insured against obsolescence even longer by supporting the latest video formats.

### Drop-in-place simplicity

The Crestron .AV Framework™ platform is the foundation of the intelligent enterprise and this huddle room. The entire room can be configured in just a few minutes with no programming. The infrastructure is easy to install, always available, easy to use, scalable, repeatable, and manageable.

### Zero-footprint solution

In the modern enterprise, space is at a premium, so Crestron's huddle room is designed to require no rack space. The entire system can be installed discreetly in a small space behind a display or under a table.

### Centralized monitoring and control

The huddle space automatically ties into Crestron's cloud-based or on-premises Crestron Fusion® monitoring and management technology. Crestron Fusion provides immediate alerts when an equipment failure is detected, such as an unplugged cable – so that it can be proactively corrected before it impacts the user.

Within Crestron Fusion, Fusion InSite™ provides managers with interactive, real-time 360-degree 3D visualization of entire buildings across the enterprise, the status of the individual spaces within them, and all the technology in the rooms.

## Crestron Fusion 3D management software

### Making data work for you

Crestron's Huddle Room solution sends usage and maintenance data to the Crestron Fusion monitoring solution, enabling you to see how often rooms and equipment are used (or abused – or at least overbooked, in the case of rooms) and where your failures occur most. Knowledge is power, and the Crestron huddle room is empowering you with the data you need to increase productivity and efficiency.

# COLLABORATION ROOM CRESTRON .AV FRAMEWORK™

**The collaboration room is an area designed for students or employees to gather to seamlessly share and create content in a highly interactive format.**

Enterprises have realized that improving collaboration among their many employees, as well as with customers and partners, is essential to creating good results in an increasingly competitive marketplace. Creating the best results requires a diverse group of people with varying backgrounds and expertise to work together.

Similarly, higher education institutions have learned that the best teaching methodologies utilize a combination of approaches. One of the most important ones is to have students working together on projects that require teamwork and collaboration.

Whereas presentation rooms are designed to focus on a single presenter, collaboration rooms are designed to enable each participant to easily present at any time.

# COLLABORATION ROOM

## CRESTRON .AV FRAMEWORK

### This room style:

- > Invites idea sharing
- > Fosters cooperation
- > Enhances discussion

### This room needs to support the following functions:

- > Share content wirelessly from a tablet, smartphone, or laptop
- > Quickly share multiple pieces of content from multiple locations
- > Present in the highest resolution video formats
- > See the availability of the room and book it if needed
- > Real-time monitoring and troubleshooting of room's technology by IT

Crestron has designed this room to meet all of the above needs, in an economical, simple, scalable way. This is Crestron's collaboration space solution for fostering collaboration in educational and enterprise spaces.

# CONFERENCE ROOM CRESTRON .AV FRAMEWORK™

**The conference room plays a key role in the way the modern office worker gets business done today. These rooms provide them with the technology to communicate and make business decisions in a larger group.**

As the modern office worker transitions from a 9-to-5 in-office schedule to flexible hours and locations, the design of office buildings has transitioned as well. Conference spaces have become more important because the main reasons to come into the office are to meet with colleagues, vendors, and customers.

Enabling the conference space to work seamlessly with modern technology and keep them running is now a business critical task.

# CONFERENCE ROOM

## CRESTRON .AV FRAMEWORK

### This room style:

- › Provides a gathering space for larger meetings
- › Enables users to present from any technology, wired or wireless
- › Must be kept up and running at all times

### This room needs to support the following functions:

- › Share content wirelessly from a tablet, smartphone, or laptop
- › Present video on multiple displays
- › See the availability of the room and book it if needed
- › Real-time monitoring and troubleshooting of room's technology by IT

Crestron has designed this room to meet all of the above needs, in an economical, simple, scalable way. This is Crestron's conference room solution.
