

MarDocs™

The only independent,
cloud-based fixture
collaboration tool.

MarDocs was designed for managing fixtures and recaps in a secure, transparent and – most importantly – independent system. So whether you're a Charterer, Broker or Owner, MarDocs can help simplify your chartering process.

The six big questions to ask when
digitising fixtures and recaps:

- 1 Is the platform completely independent from the industry's competing interests?
- 2 Will the platform enhance my company's compliance profile?
- 3 Has the platform been designed and tested to protect me against cyber threats?
- 4 Will my data remain confidential even if I stop using the platform?
- 5 Do I have 24 hour access to people who understand what I need to do?
- 6 Can I influence the future development of the platform?

Built for chartering,
designed for you.

MarDocs™

REGARDLESS OF THE TYPE OF FIXTURE, NEVER BEFORE HAVE
SPEED AND ACCURACY WORKED SO WELL TOGETHER:

Key Features

- Agreed Terms Library that can be made accessible to and editable by the Broker.
- Comprehensive look-up for vessels and technical details are imported into the fixture.
- Built-in compliance, security and audit logs.
- Keyword search functionality makes any detail easy to find.
- Recap and Charter Party document templates without formatting or layout issues.
- View and edit the latest version of your document from anywhere.
- Alerts and notification to any amendments.
- Cross-platform and browser compatibility.

Transform your chartering
process forever, **today.**

MarDocs: Another innovative offering from The Marcura Group

MarDocs FZE is a member company of The Marcura Group. It was established on the same principles of transparency, trust and independence as its sister company, DA-Desk FZ-LLC, the world's largest provider of port cost management services. Its main offerings are the CP-Desk® Services and the recently launched MarDocs System, which is designed to be the leading repository of maritime documentation and enable the parties involved in the fixture process to handle relevant documents collaboratively, instantly and effortlessly. Its independence allows it to avoid conflicts of interest, provide an extra layer of compliance and security, and treat its customers' data with utmost confidentiality.
