Why WaterLase Technology?

Practice Differentiation

Moms have a choice, and they continually choose the best for their children. By integrating the WaterLase iPlus, you offer a high-caliber experience with kid-friendly technology that moms appreciate.

ROI

In today's economic environment, it's even more important that every addition to your office equipment provide a return on that investment. Leverage your WaterLase iPlus to attract new patients and provide your current patients with a gentle experience.

Additionally, minimize chair time and increase the number of patients you can treat each day by offering laser alternatives to traditional procedures.

“

The laser sets my practice apart! I enjoy being able to inform anxious parents I have an option for their child's dental treatment that does not involve shots.”

”

Dr. Karen Foster
Aurora, CO

Common Pediatric Treatments performed with the WaterLase iPlus

- ✦ Infant & child frenectomy
- ✦ Class I-V cavity preparation
- ✦ Sealant & PRR preparation & etching
- ✦ Exposure of unerupted teeth

WaterLase iPlus Pediatric Package

Pediatric Training Course

A critical component to successful technology integration is training, which is why we partnered with the WCLI to develop this exclusive course for you. Pediatric Training Courses include both lecture and hands-on instruction in a group or private setting with state of the art technology, taught by a pediatric specialist.

WaterLase iPlus with Custom Exterior

Proven technology with the power settings you need for both deciduous and permanent teeth, with a kid-friendly design that complements your specialty office in theme or color.

Two-Year Manufacturer Warranty

Peace of mind for your office manager, knowing that the WaterLase iPlus is covered with a best-in-class two-year warranty.

In-Office Installation

Eliminate the guesswork! Our expert Field Service Engineers come to your office and provide custom installation and basic training in laser care & maintenance for your entire office.

“
I just love coming into the dentist and having the option of laser dentistry for my two kids. The whole experience is just so much better — for all of us.
”

Sarah
Parent of WaterLase Patient

“
We love to treat kids in a way that will nurture them, to grow up not fearing the dentist.
”

Dr. Mark Corke
Fort Meyers, FL

“

It is an amazing feeling to be able to tell a parent that I can treat their child's cavities without a shot. It is an even better feeling to deliver on the promise. Purchasing the WaterLase was the best practice builder I could imagine.”

Dr. Annelise Hardin
Chapel Hill, NC

“

The WaterLase is our work horse. I cannot overstate the advantage of their use in preparations on primary teeth without local anesthesia. This feature alone transformed my enthusiasm for pediatric dentistry.

Soft-tissue procedures such as gingivectomies, operculectomies, lingual and maxillary frenectomies, and biopsies are profoundly improved over a blade or electro surgery. The patients need little to no anesthesia, have significantly less postoperative discomfort, and heal more quickly.”

Dr. Betty Barr
Westminster, CO

“

With an iPlus, I can help patients through a procedure that they thought was going to be difficult and make it easy, comfortable, and fun. Especially rewarding are the infant frenotomies when I can make a positive impact on the family as well. I can confidently treat patients that would often not tolerate traditional dentistry and keep many from having treatment under general anesthesia for minimal procedures. Being educated in laser dentistry has added a new dimension to my practice and teaching of Pediatric Dentistry.”

Dr. Linda Murzyn-Dantzer
Aurora, CO
