A BELDEN BRAND

TOOLS FOR LIFE™

Auditing and Training Program

Introducing the Tools for Life™ Program

The Tools for Life program provides replacement of defective tools for all in-house installation technicians for the life of the relationship for any system that uses only PPC F- connectors and also uses Perfect Flex™ coaxial cable for 50% of their cable requirements.

Program Eligibility

To qualify for the Tools for Life program, systems are required to use only high-quality PPC F-connectors and use a minimum of 50% Perfect Flex™ coaxial cable.

How Tools for Life Works

PPC's no-cost ongoing training not only reports performance down to each individual technician, but expert trainers will inspect all technicians' tools for defects. Compression tools, prep tools, and blades will be inspected and replaced immediately (See chart below for qualifying tools). If the tool is not available at the time of inspection, it will be provided within one week—guaranteed. For each technician that attends the training, PPC will annually replace three prep tool blades and up to 10% of compression and cable preparation tools. Additionally, PPC will monitor your technicians' tool usage and provide regular audit reports to MSOs.

The Benefits of Tools for Life

Tools for Life is an extension to PPC's comprehensive training and is designed to enhance the quality of installations. Dull blades and defective tools are a major contributor to faulty installations and service calls. When you use Perfect Flex™ coaxial cable and PPC F-connectors you can be certain that you will receive superior performance and, in turn, receive superior support.
