

Diamond[®] Aerial Hardware

Enhanced Aluminum Tap Bracket

Features & Benefits

- Marine grade aluminum with 45,000 PSI tensile strength
- Design prevents bolt and plate rotation during installation
- Interlocking clamping plates assure positive and secure grip of strand
- Accepts up to 5/16" bolt for taps with ability to install without removing hardware

Overview

PPC's Diamond[®] hardware is engineered to withstand corrosive environments for decades. The combination of superior materials and mechanical galvanization provides the lowest long-term cost of service. From aerial to underground, Diamond hardware offers a full line of solutions designed to save you more.
