

## Is Your IT Infrastructure Performing Optimally? *Gain Insight into Your Enterprise with an Infrastructure Assessment*

High performance infrastructure gives businesses competitive advantage. During this assessment, our certified consultants help businesses of all sizes architect a plan to optimize their infrastructure and thrust them leagues ahead of the competition. Consolidating servers, migrating to “best-suited” cloud models, establishing disaster recovery plans—these are just a few of the things that our technical consultants are prepared to enact.

### Highlights

- Streamline infrastructure
- Integrate cloud or SaaS models with your existing applications
- Gain cloud-optimized performance
- Manage enterprise growth and lay the foundation for business continuity
- Form a disaster recovery strategy
- Mitigate project risk and costs
- Migrate data and form more efficient storage environments

### Lighthouse experts address key IT infrastructure issues, including:

- Decommission old or “off-maintenance” equipment
- Upgrade equipment to newer versions
- Consolidate servers
- Enable cloud backup recovery
- Demonstrate secure and cost effective cloud or SaaS models

### Learn answers to the following questions, and more:

- How can you make your infrastructure more robust?
- Does it make more sense to extend your current infrastructure, or replace and refresh it?
- Should you enhance your backup strategy?
- How should you factor in maintenance costs?
- Is the cloud right for your business, and in what capacity?
